[Ancient Borinquen](#) Peter E. Siegel, 2005. Native American cultures of Puerto Rico prior to the arrival of the Spanish in 1493. A book on the prehistory of a modern geopolitical entity is artificial. It is unlikely that prehistoric occupants recognized the same boundaries and responded to the same political forces that operated in the formation of current nations, states, or cities. Yet archaeologists traditionally have produced such volumes, and they generally represent anchors for ongoing research in a specific region; in this case, the island.

of Puerto Rico its immediate neighbors and the wider Caribbean basin To varying degrees this work addresses issues and draws data from beyond the boundaries of Puerto Rico because in prehistoric times the water between islands likely was not viewed as a boundary in our modern sense of the term The last few decades have witnessed a growth of intense archaeological research on the island from material culture in the form of lithics ceramics and rock art to nutritional architecture and environmental studies to rituals and social patterns to the aftermath of Conquest Ancient Borinquen provides a comprehensive overview of recent thinking new data syntheses and insights into current Puerto Rican archaeology and it reflects and illuminates similar concerns elsewhere in the West Indies lowland South America and Central America

Current Approaches to the Analysis and Interpretation of Small Lithic Sites in the Northeast Christina B. Rieth, 2008 This volume reflects the continuing interest and important contributions being made by archaeologists to the study of small lithic sites in the Northeast The articles in this volume challenge existing notions that these small sites do not produce meaningful data about the past by highlighting the ways in which prehistoric populations exploited the local landscape for settlement purposes This work has been enhanced by the use of modern analytical recovery and archaeometric techniques which not only have allowed for the reanalysis of older data sets but also have added new information to an already large regional data set The articles in this volume are grouped around three general themes Defining and Assessing the Research Potential of Small Lithic Sites Small Lithic Sites and their Contributions to Local and Regional Settlement Systems and Managing and Evaluating the National Register Significance of Small Lithic Sites Small lithic sites dating from the Archaic Period c 10 000 B P to European Contact c 500 B P are discussed within the volume s chapters Publisher s description **Crosscurrents** , 1988 Journal of graduate research in anthropology [The Middle and Later Stone Ages in the Mukogodo Hills of Central Kenya](#) G-Young Gang, 2001 Cambridge Monographs in African Archaeology 52 Series editor John Alexander
