

Canal-front development

When portions of the canal front is developed as public promenade open to the city, the private areas can have features to host activities and allow gathering in groups. An infrastructure strategy like a belt at the edge of the canal to stop of the sewage from entering the canal, the bed of the canal can be used for collecting residual water or vegetation that can be used in the public spaces. There are check points of regular control to allow water to stay in the canal bed for longer.
