

A dirt road winding through a forest. The road is flanked by tall, dry grasses and brush. The trees are mostly evergreens, and the sky is overcast. The overall tone is somewhat somber and reflective.

Today is a reality,
tomorrow's a promise,
and yesterday's history!

Becoming a Self David L. Thompson,2024-02-02 What makes us persons Is it our bodies our minds or our consciousness For centuries philosophers have sought to answer these questions While some believe humans are physical or biological in both mind and body others claim we have an immaterial soul Author and philosopher David L Thompson proposes a new alternative Based on evolutionary biology and philosophy *Becoming a Self The Past Present and Future of Selfhood* explores the development of the human self Thompson theorizes that our selves formed through connections and commitments to others when early hominins lived in tribal groups and developed languages As humans learned to fulfill these commitments they not only cultivated relationships but also created their personal identities Their habits of responsibility established their characters and therefore their reputations within their communities This naturalistic approach proposes that a self is defined by the history of its commitments to cultural and personal norms While brain processes are required the self is not some internal private mind but primarily a role within its community As technology advances selfhood could in the future be enabled by electronic quantum or other non biological means So if a self is formed through norms could artificial intelligence evolve to have self identity Thought provoking and timely *Becoming a*
