Work Place Sabotage Gerald Mars,2019-03-25 This title was first published in 2001 The examples cited in this study of sabotage in the working environment range from sophisticated tricks played in Western factories to natural reactions to inferior or unhealthy working practices in for example Malaysia and India The book contains articles from various contributors which cover numerous topics within the subject including crime and punishment in the factory employee and organizational sabotage and management techniques to prevent sabotage Charting the Operator Terrain John Ernest,1976 The purpose of this memoir is to offer a cartographic procedure for bringing some organizational sense to the prodigious task of exploring and describing the vast and varied terrain of bounded operators on a separable Hilbert space While we prove in a certain sense that the classification of all operators up to unitary equivalence is an essentially unattainable objective we hope this theory will prove serviceable in colonizing some additional enclaves as well as suggesting other more rugged areas which one might probe in search of fascinating and unusual phenomena The Psychology of Nationalism J. Searle-White,2001-11-16 Nationalism and other forms of group identity underlie many of the destructive conflicts the world is experiencing today Particularly puzzling in such conflicts is their tenacity and viciousness Why do people cling to conflicts that are damaging them Why are the feelings involved so vehement and intense Understanding the fragile nature of individual and group identity and how people perceive threats to identity can answer these questions By analyzing nationalism in Quebec Armenia and Azerbaijan and Sri Lanka this book shows that addressing the psychological dimensions of nationalism can help us understand and perhaps to intervene successfully in nationalist and ethnic conflicts
