Stakeholder Power:

Corporate Social Responsibility Subhabrata Bobby Banerjee, 2009-01-01 This book has many merits It will make fascinating reading for the increasing number of organizational scholars who wonder how organizational research can engage more in accounting for the impact of corporations on their environment in a broad sense Bahar Ali Kazmi Bernard Leca and Philippe Naccache Organization Studies This book is for those who will enjoy a thoughtful and informative monograph that acutely summarises and refreshes critique from a political and sociological perspective It is a comprehensive re interpretation of the corporate world and the evidently meretricious regime of CSR which makes it an enjoyable compendium for critical management studies fans this erudite volume will be valuable to mainstream social science academics either involved in or dismissive of CSR and sustainability discourses in management education and research David Bevan Scandinavian Journal of Management Banerjee s book is thought provoking and must be read But it should be read not only by corporate social responsibility scholars but by all business scholars It is through Banerjee s provocations that we can understand the shortcomings of corporate systems and the boundaries of corporate social responsibility Pratima Bansal Administrative Science Quarterly This is a tour de force that carefully assembles and incisively interrogates perhaps the most pressing problem of our age how to harness the resources of corporations to tackle global problems of poverty oppression and environmental degradation Banerjee does not present us with glib pronouncements or simplistic fixes Instead he brilliantly illuminates the scale of the challenges and lucidly assesses the relevance and value of CSR responses to date Hugh Willmott University of Cardiff UK Bobby Banerjee takes on the popular mythologies of neo liberal corporate social responsibility with enviable flair and a thoroughness of scholarship that will dismay its apologists His critique extends from the origins of the modern corporation and its well known abuses and excesses to far harder targets the more attractive alternatives that have been developed for theory and practice that as Banerjee shows brilliantly only serve to mask continuing neo colonial abuses Banerjee is not content simply to expose the impossibilities of doing good works whilst maximizing shareholder value the win win view of CSR but he bites the bullet with some uncompromising but realistic proposals for the future reconstruction of CSR both as a field of study and as a business practice We have needed this exposure of the bad and the ugly for a long time The current versions of CSR are simply just not good enough Stephen Linstead University of York UK Banerjee pulls the beguiling mask off corporate social responsibility Taking the vantage point of the world s poor he shows CSR to be a cruel hoax corporations cynical effort to undermine growing demands for economic and environmental justice Paul S Adler University of Southern California US This book problematizes the win win assumption underlying discourses of CSR and suggests that it is a rhetoric that is invariably subordinated to that of corporate rationality Rather than see CSR as providing the means to transform corporations by advocating a stakeholder view of the firm it argues that CSR represents an ideological movement designed to consolidate the power of transnational corporations and provide a

veneer of liberality to the illiberal economic agenda of the major global institutions Stewart Clegg University of Technology Sydney Australia Professor Banerjee offers us a refreshing analysis of corporate social responsibility CSR in an otherwise comparatively turgid literary landscape People may disagree with his criticism that because of its preoccupation with shareholder value the corporation is an inappropriate agent for social change but it is backed up by strong theoretical and substantive empirical *The ABCs of Collaborative Change* Kerry David Carson, Paula Phillips Carson, Joyce Schouest Phillips, 1997

Earned Benefit Program Management Crispin Piney, 2017-10-10 No one can disagree that benefits are good things Whether you are responsible for projects programs or portfolios you are increasingly expected to think and act in an appropriate benefits driven way However Do you understand that what may be appropriate for a project may be inapplicable for a program Can you avoid the trap of wishful thinking based on overinflated expectations and underestimated costs Can you manage your program or portfolio from inception to final delivery in a consistent benefits focused way based on a single coherent model This book describes how Earned Benefit Program Management techniques provide an innovative all inclusive model and set of tools developed specifically to answer these questions This model consolidates the key concepts of project program and portfolio management and ensures that all program and portfolio management steps are carried out based on a single signed off model in a consistent verifiable manner within a consolidated life cycle This approach guarantees alignment with strategic goals and constraints through every stage of a program Case studies highlight the key features of the approach and provide important lessons and insights for managing programs Although the ideas and concepts for each topic are fully consistent

with existing standards and other published material they are based on new thinking and go beyond current practice They provide a set of original and powerful techniques that are applicable to both programs and portfolios in a wide range of business environments

The Sociology of Financial Markets Karin Knorr-Cetina, Alex Preda, 2006 Financial markets also have a structural impact on the governance of social and economic institutions Until now sociologists have examined issues of governance mostly with respect to the legal framework of financial transactions Contributions in this book highlight the ways in which financial markets shape the inner working and structure of corporations and their governance

Sustainable Event Management. The Socio-Economic Challenges of Hosting an Eco-Friendly Music Festival Paul Schäfer, 2020-07-27 Bachelor Thesis from the year 2020 in the subject Tourism Event management grade 1 2

University of Applied Sciences Saarbrücken Fakultät Wirtschaftswissenschaften language English abstract This research analyses the extent to which sustainability at a festival can be managed and how desirable behaviour can be communicated and established With decreasing profits through record sales artists increasingly depend on live performances and touring As it is common knowledge that big music festivals often harm the environment visitors expect event organizers to comply with sustainable measures Festival managers are however restricted in their implementation of eco friendly practices as an event is dependent on the interaction of many stakeholders Music festivals offer a unique opportunity for event managers to

attempt to influence attendees' behaviour to be more sustainable through their diversity and playfulness. By creating the appropriate framework, festival creators can shift a festival towards sustainability. To do that, they must understand their stakeholders' values, motivators, drivers, and barriers of greening an outdoor music festival. This paper is based on data derived from existing research and literature in the fields of event management, sustainability, sociology, and behavioural research. It illustrates basic greening approaches along with the operational limits of event organizers.

Developing a Destination Branding Framework for Tourism Development in Zimbabwe Kumbirai Mirimi, 2018-01-19 Master's Thesis from the year 2016 in the subject Tourism Miscellaneous grade 2 1 course Tourism Management language English abstract

It is widely agreed that the recent history of economic crisis in Zimbabwe had negative effects on tourism in the country. Soon after a decade of political and economic instability, Zimbabwe is faced with several challenges to position the destination in an increasingly competitive global marketplace and to create a unique identity to differentiate itself from competitors. Thus, destination branding can be a strategic marketing component with considerable importance in promoting the discovery of the country, severely impacted by a volatile economic and political environment. This study sought to develop a destination branding framework for tourism development in Zimbabwe based on stakeholders' perspectives. The underpinning objectives were to determine the nature of Zimbabwe's tourism destination brand, to establish the tourism destination branding process in Zimbabwe, to identify the benefits of destination branding for tourism stakeholders in Zimbabwe, to identify the development preferences about destination branding in Zimbabwe, and to determine the destination branding support strategies for tourism development in Zimbabwe. A positivist philosophy was adopted for the study with a quantitative approach. The study made use of a cross-sectional survey design with a sample of 417 randomly selected tourism stakeholders. Data were analysed in SPSS with AMOS for structural equation modelling. Major findings indicate that the nature of a tourism brand, destination branding process, and branding benefits have a positive influence on stakeholder preferences about destination branding. Ultimately, stakeholder preferences about destination branding have a positive influence on support strategies for destination branding. A framework was proposed based on these findings. This framework may contribute to creating and integrating a value-added destination brand to enhance tourism development in Zimbabwe. More importantly, the research findings may help Destination Management Organisations, tourism planners, and policy makers to understand what tourism stakeholders prefer in developing the country's brand and to plan and implement sound destination branding strategies.
