

Implementing "Starting Points": A Follow-Up Study

WILLIAM A. BORGEN

The article describes a follow-up study of the implementation of a group-based needs assessment program for unemployed people titled "Starting Points." The study was conducted using a focus group methodology that resulted in 813 statements from staff and clients involved with the program. The statements were categorized within 15 themes. The themes generated suggested that the program was successful in connecting clients with needed resources. They also pointed out the importance of the way in which clients were referred to the program and the availability of resources following completion of the program. Recommendations are made regarding future implementation of the program. The article concludes with questions raised by the study regarding the implementation of employment counseling interventions generally.

The purpose of this article is to describe a study that evaluated the effectiveness of Starting Points, a group-based needs assessment program designed to assist unemployed people to make informed choices about the types of assistance that they may find helpful in beginning the process of reconnecting with the labor market. The program was originally developed by Human Resources Development Canada for newly unemployed clients (Westwood, Arundson, & Borgen, 1994). It was subsequently adapted for income assistance recipients in British Columbia who had been out of work for at least a year (Borgen, 1995).

The British Columbia adaptation of the program was initially pilot tested in a rural, an urban, and a suburban community. Minor revisions were made based on experience with the pilots, and the program was introduced to eight other centers. Approximately 6 months later a follow-up study was initiated in nine communities across the province.

William A. Borgen is a professor in the Department of Counseling Psychology of the University of British Columbia. Funding for this study was provided by the Canadian Federal/British Columbia Provincial Assessment, Counseling and Referral Strategic Initiative. The author thanks Bob Mastin and Diane Mylne from Human Resources Development Canada, as well as Norm Arundson and Jeff Borgen for their assistance in conducting the study. Handbook of Research on Cultivating Literacy in Diverse and Multilingual Classrooms Neokleous, Georgios, Krulatz, Anna, Farrelly, Raichle, 2020-03-27 Literacy has traditionally been associated with the linguistic and functional ability to read and write. Although literacy as a fundamental issue in education has received abundant attention in the last few decades, most publications to date have focused on monolingual classrooms. Language teacher educators have a responsibility to prepare teachers to be culturally responsive and flexible so they can adapt to the range of settings and variety of learners they will encounter in their careers while also bravely questioning the assumptions they are encountering about multilingual literacy development and instruction. The *Handbook of Research on Cultivating Literacy in Diverse and Multilingual Classrooms* is an essential scholarly publication that explores the multifaceted nature of literacy development across the lifespan in a range of multilingual contexts. Recognizing that literacy instruction in contemporary language classrooms serving diverse student populations must go beyond developing reading and writing abilities, this book sets out to explore a wide range of literacy dimensions. It offers unique perspectives through a critical reflection on issues related to power, ownership, identity, and the social construction of literacy in multilingual societies. As a resource for use in language teacher preparation programs globally, this book will provide a range of theoretical and practical perspectives while creating space for pre- and in-service teachers to grapple with the ideas in light of their respective contexts. The book will also provide valuable insights to instructional designers, curriculum developers, linguists, professionals, academicians, administrators, researchers, and students.

Building Custom Tasks for SQL Server Integration Services Andy Leonard, 2017-07-04 Learn to build custom SSIS tasks using Visual Studio Community Edition and Visual Basic. Bring all the power of Microsoft .NET to bear on your data integration and ETL processes and for no added cost over what you've already spent on licensing SQL Server. If you already have a license for SQL Server, then you do not need to spend more money to extend SSIS with custom tasks and components. Why are custom components necessary? Because even though the SSIS catalog of built-in tasks and components is a marvel of engineering, there do remain gaps in the functionality that is provided. These gaps are especially relevant to enterprises practicing Data Integration Lifecycle Management (DILMS) and/or DevOps. One of the gaps is a limitation of the SSIS Execute Package task. Developers using the stock version of that task are unable to select SSIS packages from other projects. Yet it's useful to be able to select and execute tasks across projects, and the example used throughout this book will help you to create an Execute Catalog Package task that does in fact allow you to execute a task from another project. Building on the example's pattern, you can create any task that you like, custom-tailored to your specific data integration and ETL needs. What You Will Learn: Configure and execute Visual Studio in the way that best supports SSIS task development. Create a class library as the basis for an SSIS task and reference the needed SSIS assemblies. Properly sign assemblies that you create in order to invoke

them from your task Implement source code control via Visual Studio Team Services or your own favorite tool set Code not only your tasks themselves but also the associated task editors Troubleshoot and then execute your custom tasks as part of your own project Who This Book Is For Database administrators and developers who are involved in ETL projects built around SQL Server Integration Services SSIS Readers should have a background in programming along with a desire to optimize their ETL efforts by creating custom tailored tasks for execution from SSIS packages
