**The Population Problem:**

   **The Population Problem** Arthur McCormack,1970      **Twenty-two Dimensions of the Population Problem** Lester Russell Brown,Patricia L. McGrath,Bruce Stokes,1976 The authors have chosen 22 areas in which population pressure has serious implications from literacy and deforestation to unemployment and individual freedom      **The Population Problem** Dorothy Nortman,1965      **The Population Problem** Alexander Morris Carr-Saunders,1922      The New Population Problem Alan Booth,Ann C. Crouter,2005-05-06 This book is based on the presentations and discussions from a national symposium on Creating the Next Generation Social Economic and Psychological Processes Underlying Fertility in Developed Countries held at the Pennsylvania State University in 2003 The papers address some of the antecedents and consequences of the recent steep declines in fertility in developed countries from different theoretical and disciplinary angles While fertility rates are still high in some less developed parts of the world the new population problem with many countries in Europe Asia and North America is declining fertility With fertility decline comes a reshaping of the population pyramid The topic of fertility decline is interesting not only at the level of the individuals and couples but also at the level of the societies that must come to grips with their long term implications Divided into four Parts the text looks at contemporary trends in U S fertility thus setting the stage for the entire volume discusses social and cultural values and attitudes analyzes fertility decisions in different countries and focuses on the possible long term consequences of current fertility trends for individuals families and societies      **Animal Conservation Ethics and the Population Problem** Leif Brostrom DeVaney,2025-07-26 In this book Leif DeVaney brings the traditional philosophical branches of metaphysics and ethics to bear on conservation biology While many previous attempts at asking and answering ethical questions related to conservation and other environmentally relevant activities exist few such attempts have engaged adequately with the rock bottom approach of metaphysics Through this metaphysically realistic lens the ontological status of the population as well as other ecological wholes is challenged DeVaney argues that individual nonhuman animals are found to have interests that parallel human interests These include the biotic goals of survival and reproduction as well as freedom from undue pain and suffering From an ethical standpoint the conclusion differs drastically from the dominant consequentialist contention that the good of some can be sacrificed for the supposed greater good of the many DeVaney initiates the establishment of the subdiscipline of conservation metaphysics which naturally leads to a theoretically grounded ethic      *The Population Problem* Thomas Humphrey Marshall,1938
   The "Population Problem" in Pacific Asia Stuart Gietel-Basten,2019-06-07 Despite the twenty first century s often being referred to as the Asian Century indicating hope for economic growth and the rebalancing of the global order population aging and stagnation present an existential threat to the success of China and other territories of Pacific Asia namely Japan Taiwan Hong Kong Singapore and South Korea This book argues that the population problem rooted in low fertility has thus far been largely considered in a linear way low fertility leads to population stagnation and rapid aging so fixing low fertility

should correct the problem However a multi dimensional lens is essential to appreciating the scale and nature of the issue and indeed to determining whether it is an issue at all Stuart Gietel Basten examines how the issue of low fertility has been constructed how blame has been apportioned and why policies designed to tackle it have yielded few results Drawing on an array of primary and secondary sources as well as examples from scholarly and popular literature The Population Problem in Pacific Asia takes a comparative approach to fertility in the region and locates mainland China in its regional context It serves as a useful resource for government workers stakeholders and students and scholars in sociology demography geography economics and area studies An Address on the Population Problem Robert S. McNamara,1977 The Population Problem Stanley Johnson,1973 Population Problems in the United States and Canada American Statistical Association,1926 **Beyond Malthus** Lester Russell Brown,Gary T. Gardner,Brian Halweil,1998 This study looks at 16 dimensions or effects of population growth in order to gain a better perspective on how future population trends are likely to affect the human prospect The evidence gathered here indicates that the rapid population growth prevailing in a majority of the world s countries is not going to continue much longer Either countries will get their act together shifting quickly to smaller families or death rates will rise from one or more stresses such as AIDS ethnic conflicts or water shortages The sixteen topics are grain production fresh water biodiversity climate change oceanic fish catch jobs cropland forests housing energy urbanization natural recreation areas education waste meat production and income Excerpt The Population Problem Franklin S. Van Scoy,1927 **Population Problems** Warren Simpson Thompson,David T. Lewis,1965 This book aims to present the most important facts relating to population in a form that is readily understandable by both the nonspecialized college student to whom it is primarily addressed and the lay reader interested in learning the significance of population growth and changes as factors influencing many aspects of our daily life in today s world However some change has been made in the amount of space devoted to the various aspects of population changes Composition of the population has received considerably more attention There is also a somewhat expanded discussion of population policies which are rapidly becoming of concern to all people The Population Problem Population Reference Bureau,1963 The "population Problem" in Pacific Asia Stuart Gietel-Basten,2019 This book argues that Asia s population aging and stagnation needs to be viewed through a multi dimensional lens serving as a useful resource for government workers stakeholders and scholars in sociology demography geography and economics Adapted from dust jacket **Population Problems** Edward Byron Reuter,1923 **Dimensions of the Population Problem in the United States [by] Peter A. Morrison. Prepared for the Commission on Population Growth and the American Future** Peter A. Morrison,United States. Commission on Population Growth and the American Future,1972 *The Population Problem* Hugh Alexander WILLIAMSON,1960 The Population Problem Alexander Morris Carr-Saunders,1974
