Israel Gohberg and Friends Harm Bart, Thomas Hempfling, Marinus A. Kaashoek, 2008-09-25 Mathematicians do not work in isolation They stand in a long and time honored tradition They write papers and sometimes books they read the publications of fellow workers in the field and they meet other mathematicians at conferences all over the world In this way in contact with colleagues far away and nearby from the past via their writings and from the present scientific results are obtained which are recognized as valid And that remarkably enough regardless of ethnic background political inclination or religion In this process some distinguished individuals play a special and striking role They assume a position of leadership They guide the people working with them through uncharted territory thereby making a lasting imprint on the field So something which can only be accomplished through a combination of rare talents usually broad knowledge unfailing intuition and a certain kind of charisma that binds people together All of this is present in Israel Gohberg the man to whom this book is dedicated on the occasion of his 80th birthday This comes to the foreground unmistakably from the contributions from those who worked with him or whose life was affected by him Gohberg's exceptional qualities are also apparent from the articles written by himself sometimes jointly with others that are

reproduced in this book Among these are stories of his life some dealing with mathematical aspects others of a more general nature Also included are reminiscences paying tribute to a close colleague who is not among us anymore speeches or reviews highlighting the work and personality of a friend or esteemed colleague and responses to the laudatio s connected with the several honorary degrees that were bestowed upon him

A Panorama of Modern Operator Theory and Related Topics Harry Dym, Marinus A.
