with the analysis portion of their work will appreciate the book's unhurried pace and thorough friendly presentation. Opening with an introduction to Excel 2016 including functions and formulas, this edition shows students how to install the Excel Data Analysis Tools option to access a host of useful analytical techniques and then walks them through various statistical procedures beginning with correlations and graphical representation of data and ending with inferential techniques and analysis of variance. New to the Fourth Edition: A new chapter 20 dealing with large data sets using Excel functions and pivot tables and illustrating how certain databases and other categories of functions and formulas can help make the data in big data sets easier to work with and the results more understandable. New chapter ending exercises are included and contain a variety of levels of application. Additional TechTalks have been added to help students master Excel 2016. A new chapter ending Real World Stats feature shows readers how statistics is applied in the everyday world. Basic maths instruction and practice exercises for those who need to brush up on their math skills are included in the appendix.

Learning R Richard Cotton, 2013-09-09. Learn how to perform data analysis with the R language and software environment even if you have little or no programming experience. With the tutorials in this hands-on guide you'll learn how to use the essential R tools you need to know to analyze data including data types and programming concepts. The second half of Learning R shows you real data analysis in action by covering everything from importing data to publishing your results. Each chapter in the book includes a quiz on what you've learned and concludes with exercises, most of which involve writing R code. Write a simple R program and discover what the language can do. Use data types such as vectors, arrays, lists, data frames, and strings. Execute code conditionally or repeatedly with branches and loops. Apply R add-on packages and package your own work for others. Learn how to clean data you import from a variety of sources. Understand data through visualization and summary statistics. Use statistical models to pass quantitative judgments about data and make predictions. Learn what to do when things go wrong while writing data analysis code.
