**Verbal Complexes** Hilda Judith Koopman, Anna Szabolcsi, 2000 In this book Hilda Koopman and Anna Szabolcsi propose a unified analysis of restructuring constructions in Hungarian Dutch and German that involves only overt phrasal movement and derives variation from the varying sizes of pied piping constituents Restructuring verbs in Hungarian exhibit three patterns the will begin up climb and the up will begin climb orders common in Dutch and the up climb begin will order common in German Traditionally these have been analyzed as involving no movement or covert movement phrasal movement and head movement respectively The first goal of this book is to develop a unified analysis where 1 the same features are checked in all three orders 2 all feature checking is achieved by overt movement and 3 all three types involve phrasal movement The second goal is to account for the significant variation across Hungarian Dutch and German which is argued to arise from the varying sizes of the constituents pied piped in the course of movement In addition to its novel theoretical claims the book presents the first systematic description of Hungarian complex verbs and the first comparison of West Germanic and Hungarian Current Studies in Linguistics No 34 *Complex Predicates* Stefan Müller, 2002-01 Complex Predicates examines a number of linguistic phenomena including auxiliary and verb combinations causative constructions predicatives depictive secondary predicates and particle and verb combinations and uses scrambling and fronting data to determine that all except the depictive secondary predicates should be treated as complex predicates Müller's analysis of inflection and derivation is compatible with syntactical analysis of particle verbs as a byproduct it also solves the particle verb bracketing paradox often discussed in the literature
