Today's Best Military Writing Walter J. Boyne, 2007-04-01 Today's Best Military Writing is the first ever collection of the finest articles on the military published in recent years. Esteemed military historian and bestselling author Walter J. Boyne has gathered twenty-one writers, both military and civilian, and their published articles and essays on all aspects of the various branches of the armed forces and on the military history of the United States. From searching analyses of wars spanning two centuries to examinations of how our country's modern armed forces are coping with new threats that are more dangerous than any they've faced before, these articles represent the best of the best: incisive, thoughtful, and probing opinions and information, often written by the people who have lived and breathed their topics. Article subjects in this volume include: A chillingly logical hypothesis that could be the next step in terrorism: mating cruise missiles with biological warfare; A call to assign coastal U.S. defense to the branch of the armed forces that is most equipped to deal with it: the Coast Guard; The history and development of the F-15 Eagle, one of the most famous jet fighters in the world; Little-known facts about the use and deployment of artillery pieces during the Indian Wars of 1860-1890; The role of U.S. Army chaplains tending to German war criminals during the Nuremberg Trials. Fighting the Slave Trade Sylviane A. Diouf, 2003-10-24 While most studies of the slave trade focus on the volume of captives and on their ethnic origins, the question of how the Africans organized their familial and communal lives to resist and assail it has not received adequate attention. But our picture of the slave trade is incomplete without an examination of the ways in which men and women responded to the threat and reality of enslavement and deportation. *Fighting the Slave Trade* is the first book to explore in a systematic manner the strategies Africans used to protect and defend themselves and their communities from the onslaught of the Atlantic slave trade and how they assaulted it. It challenges widely held myths of African passivity and general complicity in the trade and shows that resistance to enslavement and to involvement in the slave trade was much more pervasive than has been acknowledged by the orthodox interpretation of historical literature. Focused on West Africa, the essays collected here examine in detail the defensive, protective, and offensive strategies of individuals, families, communities, and states. In chapters discussing the manipulation of the environment, resettlement, the redemption of captives, the transformation of social relations, political centralization, marronage, violent assaults on ships, and entrepôts, shipboard revolts, and controlled participation in the slave trade as a way to procure the means to attack it, *Fighting the Slave Trade* presents a much more complete picture of the West African slave trade than has previously been available.
