## Swallowtail Butterflies:

**The Swallowtail Butterflies of North America** Hamilton A. Tyler, 1975     Swallowtail Butterflies T. R. New, N. Mark Collins, 1991 This is the first insect Action Plan prepared by the IUCN Species Survival Commission and was chosen because swallowtail butterflies are perhaps the most charismatic to non entomologists Some are the largest butterflies which exist and the birdwings in particular have long excited wonder and comment among naturalists of all persuasions Out of a total of 573 species 170 are considered to need conservation action This Action Plan exemplifies the wide ranging conservation needs of swallowtails by selecting a geographically broad suite of faunas and individual taxa for priority conservation action Endangering processes are accelerating alarmingly in most of the regions listed for attention The plan covers 34 regions throughout the world considering within each region the conservation status of particular species action needed and how projects could be undertaken together with an indication of costs involved     *Swallowtail Butterflies* Jane Dallinger, 1982 Introduces the various butterflies found in all parts of the world that have in common a slender pointed tip or tail on each hindwing     *Threatened Swallowtail Butterflies of the World* N. to pay less attention to morphology and more to physiology As a prominent morphologist recently said Morphology is no longer in favor and among a section of the zoological world has almost fallen into disgrace Bourne The study of the form and structure of animals is however of fundamental importance and is absolutely necessary before physiological processes can be fully understood but a course which is built up on the old fashioned morphological lines is no longer adequate for the presentation of zoological principles In writing this book the author has attempted not only to describe the most important structural features of the various types of animals but also to point out the vital phenomena as expressed in the functions of the organs
