The First European Revolution:

The First European Revolution R. I. Moore, 2000-10-19 This book provides a radical reassessment of Europe from the late tenth to the early thirteenth centuries [The First European Revolution, 1776-1815](#) Norman Hampson, Geoffrey Barraclough, 1979 Contents Include Preface I The Intellectual Climate II The Political and Social Environment III The French Revolution and the European Reaction IV The Indian Summer of Enlightened Despotism V The Victory of Reaction

The first European revolution, 1776-1875 Norman Hampson, 1969 **Past Sense — Studies in Medieval and Early Modern European History** Constantin Fasolt, 2014-04-03 The twenty studies collected in this volume focus on the transition from the Middle Ages to the modern world The method leads from technical investigations on William Durant the Younger ca 1266 1330 and Hermann Conring 1606 1681 through reflection on the nature of historical knowledge to a break with historicism an affirmation of anachronism and a broad perspective on the history of Europe The introduction explains when and why these studies were written and places them in the context of contemporary historical thinking by drawing on Wittgenstein's Philosophical Investigations This book will appeal to historians with an interest in historical theory historians of late medieval and early modern Europe and students looking for the meaning of history **Also a History of**

Philosophy, Volume 2 Jürgen Habermas, 2024-09-26 In this second volume of his groundbreaking new work on the history of philosophy Jürgen Habermas traces the development of Western thought from the reception of Platonism by early Christian thought through the revolution in medieval philosophy and theology triggered by the rediscovery of Aristotle's works up to the decoupling of philosophical and theological thought in nominalism and the Reformation that ushered in the postmetaphysical thinking of the modern age In contrast to conventional histories that focus on movements and schools Habermas takes the dialectic of faith and knowledge as a guiding thread for analysing key developments in the thought of major figures such as Augustine Aquinas Scotus Ockham and Luther that constitute milestones in the genealogy of postmetaphysical thinking A distinctive feature of Habermas' approach is the prominence he accords practical philosophy and in particular legal and political ideas and the corresponding attention he pays to social institutional and political history especially as these bear on the relationship between church and state As a result the central preoccupations of Christian thought are shown to be original responses to questions raised by the Christian worldview that exploded the framework of Greek metaphysical thinking and remain crucial for the self understanding of contemporary philosophy Far from raising claims to exclusivity completeness or closure Habermas's history of philosophy published in English in three volumes opens up new lines of research and reflection that will influence the humanities and social sciences for decades to come

Critical Theory of Legal Revolutions Hauke Brunkhorst, 2014-06-19 This unique work analyzes the crisis in modern society building on the ideas of the Frankfurt School thinkers Emphasizing social evolution and learning processes it argues that crisis is mediated by social class conflicts and collective learning the results of which are embodied in constitutional and

public law First the work outlines a new categorical framework of critical theory in which it is conceived as a theory of crisis It shows that the Marxist focus on economy and on class struggle is too narrow to deal with the range of social conflicts within modern society and posits that a crisis of legitimization is at the core of all crises It then discusses the dialectic of revolutionary and evolutionary developmental processes of modern society and its legal system This volume in the Critical Theory and Contemporary Society by a leading scholar in the field provides a new approach to critical theory that will appeal to anyone studying political sociology political theory and law

the First European Revolution ,1969 **The First European Revolution 1776-1815** Norman Hampson,1969 **The New Atheism, Myth, and History** Nathan Johnstone,2018-06-11 This book examines the misuse of history in New Atheism and militant anti religion It looks at how episodes such as the Witch hunt the Inquisition and the Holocaust are mythologized to present religion as inescapably prone to violence and discrimination whilst the darker side of atheist history such as its involvement in Stalinism is denied At the same time another constructed history that of a perpetual and one sided conflict between religion and science rationalism is commonly used by militant atheists to suggest the innate superiority of the non religious mind In a number of detailed case studies the book traces how these myths have long been overturned by historians and argues that the New Atheism s cavalier use of history is indicative of a troubling approach to the humanities in general Nathan Johnstone engages directly with the God debate at an academic level and contributes to the emerging study of non religion as a culture and an identity

The Year 1000 M. Frassetto,2016-09-27 This collection of new essays examines the long standing question of apocalyptic expectations around the turn of the first millennium Including works by scholars of medieval history literature and religion this book argues that apocalyptic expectations did exist around the year 1000 It provides a more balanced and nuanced approach to the issue than the traditional views that either identify a time of fear the terrors of the year 1000 or deny that awareness of the millennium existed This book instead recognizes that there were a variety of responses to the eschatological years 1000 and 1033 and that these responses contributed to the broader social and religious developments associated with the birth of European civilization

Bonizo of Sutri John A. Dempsey,2023-04-11 This book provides a groundbreaking reinterpretation of the life and career of the preeminent polemicist of the Bishop Bonizo of Sutri Through a meticulous analysis of Bonizo s literary works and contemporary reports about his activities the author uncovers the populist roots of both the bishop s reform ideology and his vision of holy war against a heretical emperor Henry IV of Germany In establishing the predominance of Bonizo s personal experience as a member of the populist Lombard reform community the Pataria in the formation of his thought this study shatters the picture of a uniform Gregorian party and greatly strengthens the impression of the papal reform movement as a fragile coalition of multiple regional partners like the Pataria which enjoyed a fundamental unity of purpose but whose individual constituencies often diverged in their particular strategic objectives This investigation moreover sets Bonizo s story within the context of the urban life of his native Lombardy and examines the

relationship between popular religious reform and the gradual development of communal government in northern Italy

The Unitarian Register ,1926 **Attitude of the United States Toward European Revolutions, 1830 to 1860** John James Young,1924 A History of Europe Arthur James Grant,1913 **The First European Revolution 1776-1815, with 103 Illustrations, 20 in Colour** Norman Hampson,1969 **Consortium on Revolutionary Europe, 1750-1850** Consortium on Revolutionary Europe, 1750-1850,1974-02 **A General History of the World** Victor Duruy,1912 The East European Revolution Hugh Seton-Watson,1956 **The Malady of Europe** Marcus Eli Ravage,1923 **Japan and the Pacific** Manjirō Inagaki,1890
