This is the third edition of the European Workshop on Microelectronics Education EWME A steady state regime has now
been reached An international community of university teachers is constituted they exchange their experience and their
pedagogical tools They discuss the best ways to transfer the rapidly changing techniques to their students and to introduce
them to the new physical and mathematical concepts and models for the innovative techniques devices circuits and design
methods The number of abstracts submitted to EWME 2000 about one hundred enabled the scientific committee to proceed
to a clear selection EWME is a European meeting Indeed authors from 20 different European countries contribute to this
volume Nevertheless the participation of authors from Brazil Canada China New Zealand and USA shows that the workshop
gradually attains an international dimension th The 20 century can be characterized as the century of electron The electron
as an elementary particle was discovered by J J Thomson in 1897 and was rapidly used to transfer energy and information

Thanks to electron universe and micro cosmos could be explored Electron became the omnipotent and omnipresent almost immaterial angel of our World This was made possible thanks to electronics and for the last 30 years to microelectronics Microelectronics not only modified and even radically transformed the industrial and the every day landscapes but it also led to the so called information revolution with which begins the 21 st century *VHDL Design Representation and Synthesis* James R.
