

# PRINCIPLES OF SUSTAINABLE DEVELOPMENT

## Fairness Across Generations (Intergenerational Equity)

01

We must meet today's needs without compromising the ability of future generations to meet theirs.

## Justice Within Our Generation (Intragenerational Equity)

02

Everyone should have equal access to resources, opportunities, and a decent quality of life.

## Protecting Our Planet (Environmental Stewardship)

03

Safeguarding ecosystems, reducing pollution, and conserving biodiversity are essential for a sustainable future.

## Smart Decision-Making (Integrated Approach)

04

Economic, social, and environmental factors should be considered together for balanced progress.

## The "Better Safe Than Sorry" Rule (Precautionary Principle)

05

If an action may cause harm, take preventive measures even without full scientific certainty.

## Public Participation & Transparency

06

Informed and engaged communities drive better decisions for sustainability.

## Making Polluters Pay (Polluter Pays Principle)

07

Those responsible for environmental damage should bear the costs of fixing it.

## Shared Responsibility, Different Capabilities

08

All nations should work toward sustainability, but wealthier countries must support those with fewer resources.

Holcombe,Marion Howard,2019 *Economics of the SDGs* Edward B. Barbier,Joanne C. Burgess,2022-08-12 This is the first book that employs economics to develop and apply an analytical framework for assessing progress towards the Sustainable Development Goals SDGs The authors explore the historical context for the underlying sustainability concept develop an economics based analytical framework for assessing progress towards the SDGs and discuss the implications for sustainability policy and future research Economics is concerned with analysing the trade offs in allocating scarce means to achieve various ends Thus economic methods are ideally suited to assessing how progress towards one or more SDGs may come at the expense of achieving other goals Such interactions are

inevitable in meeting the 2030 Agenda over the next decade given that the SDGs include different economic social and environmental elements Although it may be possible to make progress across all 17 goals by 2030 it is more likely that improvement toward all goals will be mixed For example we may have reduced poverty or hunger over recent years but the way in which this progress has been achieved e g through economic expansion and industrial growth may have come at the cost in achieving some environmental or social goals On the other hand progress in reducing poverty is likely to go hand in hand with other important goals such as eliminating hunger improving clean water and sanitation and ensuring good health and well being Assessing these interactions is essential for guiding policy so that countries and the international community can begin implementing the right set of environmental social and economic policies to achieve more sustainable and inclusive global development
