European Integration Theory Antje Wiener, Tanja A. Börzel, Thomas Risse, 2019

Theories of the Making of European Union Foreign Policy Jan-Henrik Petermann, 2011-11-21

Essay from the year 2005 in the subject Politics Topic European Union London School of Economics Department of International Relations language English abstract In spite of the growing empirical significance of the European Union EU as a soft power scholars of International Relations IR have found it difficult to identify a single theoretical framework to explain the making of European Foreign Policy EFP The reasons for this apparent failure of rigorous theory building may be twofold On the one hand there is still much debate about what the EU the ontological object of inquiry actually is On the other hand many authors have taken a self critical attitude towards their own discipline emphasising that there is still a multiplicity of convictions as to how we can best theorise EFP Though detailed analyses of the specific pattern of the EU s external relations have indeed been marginalised for a long time it seems plausible to trace this lack of theoretical coherence back to the nature of EFP itself It is often argued that the EU is a political system sui generis a complex structure that is neither a state nor a non state actor and neither a conventional international organization nor an international regime In a similar vein some observers assert that the EU might most suitably be characterised as a hybrid political sphere that does not easily lend itself to classical Foreign Policy Analysis FPA In fact the major IR perspectives on EU foreign policy making neorealist neoliberal and constructivist appear to be largely incompatible in this respect Within each framework certain claims are made which effectively rule out or downgrade the validity and reliability of key premises in rival approaches Therefore the central question posed in this essay is Which theory best explains the making of EU foreign policy And if there is no single theoretical paradigm might there be any potential for an analytical synthesis in order to understand the particular features of EFP more appropriately To answer these questions I will first describe the main views on the development of EFP represented by the above mentioned approaches within the broader context of theorising European integration Secondly I will outline in how far the EU s peculiar nature as a system of multi level decision making can be regarded as a core empirical challenge to the concepts of conventional FPA I will conclude that different theoretical schemes ought to be applied to different issue areas of foreign policy making in a more selective manner if the complex processes of EFP are to be fully understood

Theorising the Crises of the European Union Nathalie Brack, Seda Gürkan, 2020-12-30 This book examines the relevance of integration theories for studying and analyzing the crisis situations faced by the EU since 2009 Ten years on

from the start of the age of crisis it critically analyzes the impact of the multiple crises context on the EU polity and questions the utility of integration theories for grasping the peculiarities of the particular crisis under study Bringing together prominent scholars in EU studies the volume constitutes an essential reference book on integration theories Its contribution is twofold Firstly it provides a comparative overview of classical integration theories for studying and analyzing current crisis situations the EU faces Secondly the book connects theories to current debates through an in depth discussion of recent crises that hit European integration since 2009 with a particular focus on the financial crisis Brexit refugee crisis illiberal tendencies in some member states and the Coronavirus pandemic This book will be of key interest to scholars and students of European integration European Union politics political theory and more broadly to European studies

Gendering European Integration Theory Gabriele Abels, Heather MacRae, 2016-05-23 The authors engage a dialogue between European integration theories and gender studies The contributions illustrate where and how gender scholarship has made creative use of integration theories and thus contributes to a vivid theoretical debate The chapters are designed to make gender scholarship more visible to integration theory and in this way stimulates the broader theoretical debates Investigating the whole range of integration theory with a gender lens the authors illustrate if and how gender scholarship has made or can make creative use of integration theories

The Disparity of European Integration Borzel Tanja, 2013-10-31 This new study revisits the work of the late Ernst Haas assessing his relevance for contemporary European integration and its disparities With his seminal book *The Uniting of Europe* Haas laid the foundations for one of the most prominent paradigms of European integration neofunctionalism He engaged in inductive reasoning to theorize the dynamics of the European integration process that led from the Treaty of Paris in 1951 to the Treaty of Rome in 1957 The Treaty of Rome set the constitutional framework for a Common Market Today a second Treaty of Rome may lay the foundation for a European Constitution that embeds the Common Market in a European polity Unfortunately Haas will not be able to witness this path breaking step in the development of a European political community which he so aptly theorized almost five decades ago This is all the more regrettable since students of European integration are more than ever challenged to tackle a major empirical

puzzle After 50 years of European integration the member states managed to adopt a single currency and to develop common policies and institutions on justice and home affairs The integration of foreign policy and defence by contrast is still lagging behind This text delivers sharp insights into these issues This book previously published as a special issue of the Journal of European Public Policy will be of great interest to all students and scholars of international relations the European Union European politics and Public Policy Theory and Reform in the European Union Dimitris N. Chrysochoou,2003-07-18 This substantially updated and revised edition offers a comprehensive overview of the challenges confronting the political system as well as the international politics of the European Union It draws from a rich spectrum of regional integration theories to determine what the Union actually is and how it is developing The book examines constitutional politics of the European Union from the Single European Act to the Treaty of Nice and beyond The ongoing debate on the future of Europe links together questions of democracy and legitimacy competences and rights and the prospects for European polity building The aim is to contribute to a better understanding of the emerging European polity and the questions that further treaty reform generate for the future of the regional system The authors also assess the evolving European security architecture the limits and possibilities of a genuine European foreign security and defence policy and the role of the European Union in the post Cold War international system Common themes involve debates about stability and instability continuity and change multipolarity and leadership co operation and discord power capabilities and patterns of behaviour The book traces the defining features of the new order in Europe and incorporates an analysis of the post September 11 context This major new edition will be of particular interest to academics policy makers and students with an interest in the politics and governance of contemporary Europe as well as to those pursuing a career in international affairs **European Integration Between Political Science and International Relations Theory** Thomas Christiansen,1994
