**Life Skills for All Learners** Antarina S. F. Amir, Thomas R. Guskey, 2024-01-11 The clearest guide yet to preparing today's students to succeed in a rapidly changing and increasingly complex world. Information societies and life in general require a host of skills beyond those found in the traditional school curriculum. Yet nearly a quarter of the way through the 21st century, educators are still looking for clarity on what these skills are and a comprehensive whole school model that explains how to teach and develop them, how to observe and assess them, and how to report learning progress to students, parents, and families. That wait is over. In *Life Skills for All Learners*, authors Antarina S. F. Amir and Thomas R. Guskey, collaborating with a team of practitioner colleagues at HighScope Indonesia Institute, share a comprehensive classroom-tested framework for teaching, assessing, and reporting eight of education's new essential skills: Meta Level Reflection, Expert Thinking, Creativity, and Innovation, Adaptability, and Agility, Audience-Centered Communication, Synergistic Collaboration, Empathetic Social Skills, and Ethical Leadership. Packed with targeted learning activities, grade- and subject-inclusive examples, and skill-specific rubrics mapping a continuum of deliberate development from the earliest elementary years through high school graduation, this resource provides teachers, school leaders, and curriculum developers with the practical advice and inspirational guidance they need to set up all students for lasting success.

**Beginning Self-Study Research** Brandon M. Butler, Kristen H. Gregory, Mark M. Diacopoulos, Angela P. Branyon, 2026-01-07 This book is an essential guide for novice and experienced self-study researchers, offering practical insight into the lived experience of conducting self-study research. Unlike abstract methodologies, self-study is embodied through practice and often learned collaboratively. Because it resists traditional instruction, newcomers frequently ask S-STEP researchers: How does one learn self-study? This recurring question highlights the need for accessible frameworks and processes to support emerging scholars. By addressing this gap, the book equips readers with foundational tools to navigate the complexities of self-study and fosters deeper understanding of how to learn through reflective inquiry and shared exploration. Each chapter is supported by existing literature on self-study research, as well as examples from the authors' own experiences and the experiences of others. The inclusion of prompts, activities, and recommended resources in each chapter enhances the learning process. With this book as a guide, we hope that S-STEP researchers will individually and

collaboratively learn how to effectively conduct self study research and contribute meaningfully to the scholarly community by making their self study research public *Fostering Critical Pedagogy in the ELA Classroom* Meghan E.
