Kabbalah, Science and the Meaning of Life Michael Laitman, 2006-01-01 Science explains the mechanisms that sustain life Kabbalah explains why life exists In Kabbalah Science and the Meaning of Life Rav Michael Laitman PhD a kabbalist and a scientist combines science and spirituality in a captivating dialogue that reveals life's meaning For thousands of years kabbalists have been writing that the world is made of a single entity divided into separate beings Today the cutting edge science of quantum physics states a very similar idea that at the most fundamental level of matter we are all literally one Science proves that reality is affected by the observer who examines it And so does Kabbalah But Kabbalah says more even the Creator of reality is found within the observer In other words God is inside of us he doesn't exist anywhere else When we pass away so does he These earthshaking concepts and more are eloquently introduced so that even readers uneducated in Kabbalah or science will easily understand them Therefore if you're just a little curious about why you are here what life means and what you can do to enjoy it more this is your book
