Kid-friendly text explains the axial skeleton which includes the skull, the spine, the breastbone, and ribs, and the appendicular skeleton which includes all the bones that branch off the axial skeleton including arms, hands, legs, and feet. Readers learn that babies are born with 300 bones, some of which are made of cartilage. The hardening and fusing of bones as babies grow is discussed. Also highlighted are bone fractures and how they heal, diseases that affect the skeletal system such as arthritis and osteoporosis, and how to care for the skeletal system with a healthy diet, plenty of calcium, and lots of exercise.
