## **Structure Approximation In Physical Th:**

Structure and Approximation in Physical Theories A. Hartkämper, Heinz-Jürgen Schmidt, 1981-11 The present volume contains 14 contributions presented at a colloquium on Structure and Approximation in Physical Theories held at Osnabrück in June 1980 The articles are presented in the revised form written after the colloquium and hence also take account of the results of the discussion at the colloquium It is a striking feature that the problem of approximation in physical theories has only recently found some attention in the philosophy of science although the working physicist is constantly confronted with those questions No interesting theory of exact science exactly fits its experimental data almost every relation between different theories is an approximate one Therefore an adequate reconstruction of physical theories must take into account and conceptualize the moment of approximation The majority of the articles in this book is centered around this subject There are at least two elaborate structuralistic approaches to the formalization of physical theories in which the aspect of approximation has been incorporated the approach due to P Suppes J Sneed W Stegmüller S approach and the approach of G Ludwig and his co-workers L approach The articles in this book correspondingly fall into three classes presentation elaboration and critique of the L approach Hartkämper Schmidt Ludwig Neumann Werner Schmidt Mayr Kamiah Majer Grafe or of the S approach Moulines Balzer Cooke and articles referring to both approaches or concerned with related matters Scheibe Pfarr Castrigiano Of course this is only a rough classification and each article must be appraised in its own right

**Structural Analysis of Historical Constructions: Anamnesis, Diagnosis, Therapy, Controls** Koen Van Balen, Els Verstrynghe, 2016-11-03 Structural Analysis of Historical Constructions Anamnesis diagnosis therapy controls contains the papers presented at the 10th International Conference on Structural Analysis of Historical Constructions SAHC2016 Leuven Belgium 13-15 September 2016 The main theme of the book is Anamnesis Diagnosis Therapy Controls which emphasizes the importance of all steps of a restoration process in order to obtain a thorough understanding of the structural behaviour of built cultural heritage The contributions cover every aspect of the structural analysis of historical constructions such as material characterization structural modelling static and dynamic monitoring non-destructive techniques for on-site investigation seismic behaviour rehabilitation traditional and innovative repair techniques and case studies The knowledge insights and ideas in Structural Analysis of Historical Constructions Anamnesis diagnosis therapy controls make this book of abstracts and the corresponding digital full-colour conference proceedings containing the full papers must have literature for researchers and practitioners involved in the structural analysis of historical constructions
