Dani, Athanase Papadopoulos, 2019-10-18 This is a collection of surveys on important mathematical ideas their origin their evolution and their impact in current research The authors are mathematicians who are leading experts in their fields The book is addressed to all mathematicians from undergraduate students to senior researchers regardless of the specialty *Geometry, Language And Strategy: The Dynamics Of Decision Processes - Volume 2* Gerald H Thomas, 2016-09-15 The first volume *Geometry Language and Strategy* extended the concepts of Game Theory replacing static equilibrium with a deterministic dynamic theory The first volume opened up many applications that were only briefly touched on To study the consequences of the deterministic approach in contrast to standard Bayesian approaches the richness of applications requires an engineering foundation and discipline which this volume supplies It provides a richer list of applications such as the Prisoner s Dilemma which extends the resonant behavior of Vol 1 to more general time dependent and transient behaviors **The Nature of Order: The process of creating life** Christopher Alexander, 2002 This four volume work allows the reader to form one picture of the world in which the perspectives from science beauty and grace and commonsense intuitions are interlaced [The Relevance of René Thom](#) Isabel Marcos, Clément Morier, 2024-08-29 The body of work presented in this book comes from research carried out since 2017 as part of the international Actualit de Ren Thom project This project was initially entitled Morphology and qualitative dynamics Knowledge of forms Forms of knowledge Subsequently the name Relevance of Ren Thom was chosen for its clarity and evocative power The aim of this research project is to promote the scientific relevance of Ren Thom s thinking on forms and to demonstrate the importance of his method and discoveries It is based on discussions of Thom s thinking and the method he proposes i e to seek out dynamic structures in order to understand changes of form in nature and at the human social level to explain the transformation of these dynamic forms to study the morphologies of process in various fields in order to advance scientific knowledge The

relevance of this thinker has manifested itself in the form of monthly sessions of a research seminar held from 2017 to 2022 as well as in the form of international congresses 2018 2019 bringing together the greatest friends and continuators both of the work of Ren Thom himself and of reflection on morphogenetic dynamics in the most diverse disciplines This created a space for dialogue and listening between the exact sciences and the social and human sciences Indeed the fields of study are necessarily interdisciplinary since as Ren Thom teaches us morphological organization or form in its exchanges with matter must be considered as independent of its substrate i e the environment in which this morphogenesis unfolds Finally this book marks a symbolic moment it takes shape in the year that marks the centenary of the birth of Ren Thom who was born in the French town of Montbliard in 1923 To mark this centenary 1923 2023 a number of initiatives have been launched to celebrate the discoveries and advances of this mathematician philosopher as he liked to call himself The publication of the present book is one more which we hope will shed light that will stimulate the morphological gaze Thom so urged us to adopt
