La oportunidad del software libre : capacidades, derechos e innovación EOI Escuela de Organización Industrial, *Open Source Software: Mobile Open Source Technologies* Luis Corral, Alberto Sillitti, Giancarlo Succi, Jelena Vlasenko, Anthony I. Wasserman, 2014-04-15 This book constitutes the refereed proceedings of the 10th International IFIP WG 2.13 Conference on Open Source Systems OSS 2014 held in San José Costa Rica in May 2014. The 16 revised full papers and 16 short papers presented together with 5 poster papers were carefully reviewed and selected from 61 submissions. They have been organized in the following topical sections: open source visualization and reporting; open source in business modeling; open source in mobile and web technologies; open source in education and research; development processes of open source products; testing and assurance of open source projects; and global impact on open source communities and development. The last section consists of five case studies and demonstrations of open source projects. **Free and Open Source Software (FOSS) and other Alternative License Models** Axel Metzger, 2015-11-30 This book discusses the main legal questions raised by free and open source software (FOSS) licenses and other alternative license models such as Creative Commons. The legal questions raised by FOSS and other alternative licenses have been the subject of an intense international debate among legal scholars and practising lawyers in the last years. Courts in different jurisdictions have confirmed that the core features of FOSS licenses are compliant with the respective applicable laws and thus enforceable in the respective jurisdictions. What is still missing so far is an in-depth comparative analysis of the legal issues raised by FOSS, Creative Commons and other alternative license on a worldwide scale. This book presents a general report on FOSS licenses and alternative license models to establish common ground and enable comparison between jurisdictions. The general report is followed by 24 national reports covering the world's most important IT markets. General and national reports use the same structure to facilitate the comparison. The book shows that despite the differences in their origins, all FOSS projects use detailed licenses for the organisation of their communities. It also shows the differences in the proofing of these licenses by courts in some jurisdictions and the tailor-made provisions established by some legislators to solve the legal issues raised by the license model. **Manual Oficial Cinelerra CV** Cinelerra CV Team, *Software libre*, 2004 *Software Process Improvement for Small and Medium Enterprises: Techniques and Case Studies* Oktaba, Hanna, Piattini, Mario, 2008-04-30 Software engineering is of major importance to all enterprises; however, the key areas of software quality and software process improvement standards and models are currently geared toward large organizations where most software organizations are small and medium enterprises. *Software Process Improvement for Small and Medium Enterprises: Techniques and Case Studies* offers practical and useful guidelines, models and techniques for improving software processes and products for small and medium enterprises utilizing the authoritative demonstrative tools of case studies and lessons learned to provide academics, scholars and practitioners with an invaluable research source. **Advances on Mechanics,**

Design Engineering and Manufacturing II Francisco Cavas-Martínez, Benoit Eynard, Francisco J. Fernández Cañavate, Daniel G. Fernández-Pacheco, Paz Morer, Vincenzo Nigrelli, 2019-04-27 This book contains the papers presented at the International Joint Conference on Mechanics Design Engineering and Advanced Manufacturing JCM 2018 held on 20-22 June 2018 in Cartagena Spain. It reports on cutting edge topics in product design and manufacturing such as industrial methods for integrated product and process design, innovative design and computer aided design. Further topics covered include virtual simulation and reverse engineering, additive manufacturing, product manufacturing, engineering methods in medicine and education, representation techniques and nautical aeronautics and aerospace design and modeling. The book is divided into six main sections reflecting the focus and primary themes of the conference. The contributions presented here will not only provide researchers, engineers and experts in a range of industrial engineering subfields with extensive information to support their daily work, they are also intended to stimulate new research directions, advanced applications of the methods discussed and future interdisciplinary collaborations.

Sexing Code Claudia Herbst, 2008. Critically investigating the gender of programming in popular culture. *Sexing Code* proposes that the de facto representation of technical ability serves to perpetuate the age-old association of the male with intellect and reason while identifying the female with the body. Challenging this division in which code is situated within the male sphere, the discussion highlights women's contributions in the writing and theorizing of code, particularly in the digital arts, hacking and hacktivism. Presenting an accessible and lively discussion, *Sexing Code* demonstrates that the gendering of programming selectively confers the privilege of authorship and is therefore a salient factor in the production of culture in the twenty-first century.
