Technological innovation is essential to the future well being of the United States The ability of the nation to sustain economic growth increase its standard of living and improve human health and the environment depends in many ways on its success in developing and commercializing new products processes and services The growing capabilities of competitors in Europe Asia and elsewhere around the world increasingly challenge the ability of U S firms to convert the nation s science and technology base into a competitive advantage Such concerns have prompted much debate about the proper role of government in encouraging innovation and the commercialization of new technologies To date however the debate has been hampered by an incomplete understanding of the ways in which firms develop and market new products processes and services and the barriers they must overcome in the process Advanced Technologies Applied to Training Design Robert J. Seidel,Paul R. Chatelier,2012-12-06 This collection of papers is the result of a workshop sponsored by NATO s Defense Research Group Panel 8 in the Fall of 1991 The workshop is the second of a series the first of which was held in the Spring of 1985 As you study these papers recall that this workshop occurred during the time that many changes were occurring in Eastern Europe and world wide The need to identify training technologies for maintaining a capable and ready force during times of decreases in military force structure was and is currently our challenge The opportunities for these technologies to provide a service and opportunity for nonmilitary usage is our future Therefore this workshop maintained its focus on technology and application regardless of the user These and other statements made herein are personal and reflect the opinions of the author s and in no way represent the official position or policy of our individual governments v PREFACE The truly international contributions to this book reinforced our belief that training technology must be collaborative and data widely shared to strengthen our future We want to thank the authors of these papers for their abilities to see beyond the near horizon Their contributions and the support of the organizations that sponsored their work is greatly appreciated We also gratefully recognize the contributions of all who attended the workshop **Network World** ,1991-10-28 For more than 20 years Network World has been the premier provider of information intelligence and insight for network and IT executives responsible for the digital nervous systems of large organizations Readers are responsible for designing implementing and managing the voice data and video systems their companies use to support everything from business critical applications to employee collaboration and electronic commerce Publications of the National Institute of Standards and Technology ...
