Albert J. DeBenedictis

The Java Man:

Java Man Carl C. Swisher III, Carl Celso Swisher, Garniss H. Curtis, Roger Lewin, 2001-11 Garniss lend me your knife for a second will you I whispered So begins Java Man the inside story of how one discovery a human skull found on the island of Java by two geologists shook the foundations of science By uncovering new evidence about the hominid known as Java man Carl C Swisher and Garniss H Curtis were able to date his fossil remains at 1 7 million years an age that stunned the scientific community because it pushed back the time when humans migrating out of Africa first reached Eurasia by nearly one million years Cowritten by the popular science writer Roger Lewin this is a gripping and informative account of the discovery that breathed new life into the human origins debate Originally published by Scribner 2000 ISBN 0 684 80000 4

Society & Culture , *Bones of Contention* Marvin L. Lubenow, 2004-10-01 Seeking to disprove the theory of human evolution the author examines the fossils of the so called ape men Evolution or Creation? Albert J. DeBenedictis, 2011-08-26 Have you ever wondered how the universe originated or whether the universe always existed Have you ever wondered how life began on earth Have you ever heard others discuss origins but felt unable to contribute to the conversation Would you like to defend your views but feel unequipped or inadequate to do so Are you unsure about what to believe Would you like to learn more about the subject of origins If so this book will be a help to you The subject of evolution and creation often causes much contention and controversy The question that may be asked is Why is there so much tension and animosity between those who hold to opposing views regarding the subject of origins Others may ask What do those of opposing views base their beliefs upon Is there any reconciling of the different views The differences I believe in part are due to ones perceptions regarding science and theology This book is not about Christians versus atheists This book is more about creation versus evolution than about Creationism versus Evolutionism This book is about comparing various views opinions and evidence related to evolution and creation Some of the information being presented may be new to you and may take some time to digest Evolutionists generally view creation in the same way that creationists generally view evolution Opposing views are rarely taken seriously as they are a contradiction to ones own bias Whatever your current views are regarding the origins of the universe and life or level of knowledge of origins this book is about considering various sides of the issue of evolution In this book we will be comparing the evidence and arguments and then weighing the pros and cons in an attempt to determine the validity of each view You will however be left to make your own decisions about each subject that is presented This book may either strengthen your current views of origins or may cause you to re think what you currently believe about origins Whatever your views are regarding the origins of the universe and life this book is about considering various sides of the issue of evolution In this book the evidence and arguments will be presented for the reader to determine the validity of each view Subjects such as the origin of the universe the age of the universe the fossil evidence the possibilities of a global flood the origins of life Stanley Millers Experiment of 1953 the fossils in the strata of the earth the

components of evolution Natural Selection Adaptation Mutations Speciation and Genetic Drift Punctuated Equilibrium
 Haeckels Embryos and Recapitulation Vestiges Pseudogenes Biological Complexity and Intelligent Design Comparing
 biological similarities and differences between Chimpanzee and human genome Comparing the Human and Ape Fossil
 Evidence will be examined Multiple top resources of various professions have been included in this book to provide
 information on the many different subjects discussed Although this book is an in depth study of evolution it was written on
 the level so that the average teenager or adult will be able to understand what is being presented Difficult words and terms
 are explained so that you will not need to consult a dictionary every time an unknown word or term appears I attempted to
 present the subject matter on a level that most people will be able to easily understand The various views and arguments are
 presented in a manner similar to having a debate The aim of this book is to help either strengthen your current views of
 origins or cause you to re think what you currently believe It is hoped that at least you will develop a better appreciation for
 the opposing views and will better understand why those who believe in the opposing views believe as they do I sincerely
 hope that this book will be beneficial to you whether you are se
