## **Very Special Intelligence:**

**Very Special Intelligence** Patrick Beesly, 1978      *Very Special Intelligence* Patrick Beesly, 2015-06-02 Operational Intelligence Centre was the nerve centre of the British Admiralty in World War II dedicated to collecting analyzing and disseminating information from every possible source which could throw light on the intentions and movements of German naval and maritime forces OIC labored tirelessly despite early disappointments to supply the Navy and RAF with the intelligence that would enable them to defeat Hitler and his admirals Patrick Beesly an insider drawing on considerable personal knowledge reveals in full the compelling story of OIC He throws light on dramatic episodes such as the hunt for the Bismarck the tragedy of Convoy PQ17 the long war against the U boats and on many other significant events critical to the course of the war Very Special Intelligence here presented with a new Introduction which sets the work in context and takes account of new research is the fascinating story of an organization which contributed so much to Allied success      The Battle of the Atlantic and Signals Intelligence David Syrett, 2018-12-07 This title was first published in 2002 This book contains the U boats situations and trends written by the staff of the Admiralty s Operational Intelligence Centre during the Second World War Based largely on communications intelligence the U boat situations and trends were designed to inform a small number of senior officers and high officials of the latest events and developments in the Allied war against the U boats The Battle of the Atlantic and the war against the U boats was the longest and the most complex naval battle in history In this huge conflict which sprawled across the oceans of the world the U boats sank 2 828 Allied merchant ships while the Allies destroyed more than 780 German U boats These documents relate on a weekly and in some cases a daily basis exactly what the Allies knew concerning the activities of the U boats during the Battle of the Atlantic      **British Naval Intelligence through the Twentieth Century** Andrew Boyd, 2020-08-30 This is the first comprehensive account of how intelligence influenced and sustained British naval power from the mid nineteenth century when the Admiralty first created a dedicated intelligence department through to the end of the Cold War It brings a critical new dimension to our understanding of British naval history in this period while setting naval intelligence in a wider context and emphasising the many parts of the British state that contributed to naval requirements It is also a fascinating study of how naval needs and personalities shaped the British intelligence community that exists today and the concepts and values that underpin it The author explains why and how intelligence was collected and assesses its real impact on policy and operations It confirms that naval intelligence was critical to Britain s survival and ultimate victory in the two World Wars but significantly reappraises its role highlighting the importance of communications intelligence to an effective blockade in the First and according Ultra less dominance compared to other sources in the Second It reveals that coverage of Germany before 1914 and of the three Axis powers in the interwar period was more comprehensive and effective than previously suggested and while British power declined rapidly after 1945 the book shows how intelligence helped the Royal Navy to remain a significant global force for the rest of the

twentieth century and in submarine warfare especially in the second half of the Cold War to achieve influence and impact for Britain far exceeding resources expended This compelling new history will have wide appeal to all readers interested in intelligence and its crucial impact on naval policy and operations

For centuries the world has witnessed the development and use of increasingly complex and powerful military systems and technologies In the process the art of war has truly become the art of combined arms warfare in which infantry artillery air support intelligence and other key elements are all coordinated for maximum effect Nowhere has this trend been more visible than in the history of twentieth century warfare Originally published as an essential in house study for U S Army officers during the 1980s this much revised and expanded edition remains the most complete study available on the subject Rewritten with a much wider readership in mind it both retains its enormous practical utility for military professionals and provides a valuable and appealing introduction for scholars and general readers Jonathan House author of the original work brings the story of combined arms up to the present covering among other things Desert Storm the war in Chechnya and the rise of smart weapons and related technologies He traces the evolution of tactics weapons and organization in five major militaries American British German Russian and French over 100 years of warfare Revealing both continuities and contrasts within and between these fighting forces he also provides illuminating glimpses of Israeli and Japanese contributions to combined arms doctrine Expanding his insightful analysis of the world wars and the wars in Korea and Vietnam House also offers much new material focused on the post Vietnam period Throughout he analyzes such issues as command and control problems of highly centralized organizations the development of special operations forces advances in weapons technology including ballistic and anti ballistic missile systems the trade offs involved in using heavy versus light armed forces and the enduring obstacles to effective cooperation between air and land forces His strong critique of the air superiority propaganda that came out of the Gulf War is sure to spark some heated debates Rigorously comparative House s study addresses significant questions about how nations prepare for war learn or don t learn its harsh lessons and adapt to changing times and technologies Unique in the annals of the literature on warfare it will be the standard work on this subject
