Which Psychotherapy Leading Exponents Explain Their Differences:

Which Psychotherapy? Colin Feltham, 1997-04-07 This controversial book argues that 20th century psychotherapy has been fundamentally characterized by serious disagreement on views of human nature treatment rationales and goals Focusing on the differences rather than the commonalities in therapy eight eminent practitioners demonstrate the diversities in therapies and why for the most part it is not possible to tolerate or integrate with other approaches The book awakened me to understanding more about how a core belief or orientation can result in polarised attitudes towards the person At the same time in some cases there is fundamental common ground which could potentially lead to genuine integration ac Eisteach The Journal of the Irish Association for Counselling and Therapy Eight distinguished practitioners address twelve different questions aimed at identifying the distinctive qualities of their own approach and demonstrating how it has been arrived at The result is a book that will allow both experienced practitioners and trainees to become familiar with and compare the current thinking of these well known people the very passion of these opposing and sometimes exclusive convictions may be the well spring for the efficacy and achievements of these eminent practitioners and trainers Self what criticisms of the approach they consider to be valid which approaches they consider to be ineffective misleading or dangerous and conversely more promising or effective why their approach is more effective or comprehensive and why it may be more suited to certain clients or client problems and how they account for research which suggests that no one approach seems more effective than any other Critical Thinking in Counselling and Psychotherapy Colin Feltham, 2010-06-22 This innovative new textbook examines the critical debates around key topics in counselling and psychotherapy In nine sections including Everyday Counselling Practice Training and Curriculum Issues and Counselling Society and Culture Colin Feltham explores 60 provocative questions central to counselling training and practice Ranging from more mainstream subjects like unconditional positive regard ethics and supervision to broader social or philosophical issues such as employment concerns and the debate on assisted suicide entries include Why have we focused on core theoretical models What are the pros and cons of short term time limited counselling What s wrong with CBT Where is research taking us Is statutory regulation a good and inevitable development Are there limits to personal change in counselling Each section includes questions for reflection case studies and student exercises This comprehensive student friendly text is a useful resource for lecturers to stimulate seminar discussion and for all trainees wishing to write essays or generally develop their critical thinking in counselling and psychotherapy Controversies in Psychotherapy and Counselling Colin Feltham, 1999-08-12 My congratulations to Colin Feltham for assembling a set of contentious issues and lively authors which together made me forget my surroundings Person Centred Practice Editor Colin Feltham s choice of topics shows an astute on the ground awareness of the issues that dog the industry while still making lively reading New Therapist In this book leading practitioners critics and commentators take sides on many topical and core debates including

Theoretical issues Does the unconscious really exist Is birth trauma a fiction Should one believe in false memories Clinical issues Is therapy effective Is the relationship central to success Do therapists pathologize their clients Are boundaries necessary Professional issues Do trainees need therapy Is professionalization of the field desirable Are counselling and psychotherapy really distinguishable Social issues Can therapy be proven necessary Does therapy benefit individuals or contribute to social control Does stress really exist
