Abstract—Objective: Promote the management's system actively to meet the need of 《The national medium and long-term education reform and development plan》 Under the background of the development of the University's forces to participate in the running mechanism of the school. **Methods:** In the following areas: the construction of electrical professional courses, the construction of practical ability, school enterprise cooperation, teaching staff and other aspects is to improve the practical ability of students and enable them adapt to the development of time. **Results:** The construction of the university in the building of electrical professional undergraduate students in practice ability, innovative spirit and self development in a favorable environment conditions. The training system model of students' practical ability in building electrical specialty is obtained. **Conclusion:** the construction of electrical engineering professional personnel training quality assurance system, play students' professional advantages, to improve students' ability and quality of social services, effectively improve the quality of personnel training.

Keywords- separation of supervision management and assessment ; building electrical ; practical ability ; Engineering education; training objectives

I. INTRODUCTION

"separation of supervision management and assessment" is an important measure to construct the modern school system. The score from the management of the management and the function of the management and office is helpful to improve the management of the management, optimize the allocation of educational resources, improve the level of supervision and service. After graduation, the students of electrical engineering in the construction of the university become an engineer with the spirit of innovation, which is the ultimate goal of Engineering Education in China and the urgent need for China to carry out the modernization construction[1-3].

II. TRAINING OBJECTIVES OF ELECTRICAL SPECIALTY IN ARCHITECTURAL COLLEGES

The cultivation of the undergraduate course of electrical engineering in the construction of the university is the quality and ability that should be cultivated in the field of the application engineer. Engineering colleges and universities take the important responsibility of training engineers. This requires that colleges and universities

Study Of Practical Ability:

The Study of Real Skills W. T. Singleton, 1978 **A Study of Practical Ability** Margaret McFarlane, 1925 The analysis of practical skills W.T. Singleton, 2013-06-29 The origins of this book are in my first attempts to understand psychology as a post war student in the Cambridge of the late 1940s Sir Frederic Bartlett and his colleagues in the Psychology Department were talking and writing about the concept of the skill as the fundamental unit of behaviour This made entire sense to me but not apparently to very many other people because the movement dwindled rapidly with the retirement of Sir Frederic in 1952 It got lost within performance studies which were essentially behaviouristic and stimulus response in origin a quite different style of thinking from the gestalt approach of skill psychology This is not a simple dichotomy of course and skill psychology does go some way towards the analytic approach in accepting that a science needs to have a basic element a unit from which the complexities of real behaviour can be constructed into which it can be analysed and in terms of which it can be described and understood The trick is to pick the right unit and I think that skills is an appropriate unit for human behaviour Note the plural although these units are elements they are not identical any more than the ninety odd elements of the physical world are identical The issue is sometimes clarified by considering the analogy with the attempt to describe a house The simplest observable elements here are the brick the piece of stone or the piece of wood
