reflecting increased exposure to foreign technology as a result of linkages with high skilled diasporas and the opening of these countries to international trade and foreign direct investment On the other hand the technology gap remains large and the domestic factors that determine how quickly technologies spread within developing countries often stymie progress especially among low income countries This year s Global Economic Prospects comes on the heels of an extended period of strong growth and a 15 year period of strong performance in much of the developing world which has contributed to substantial declines in global poverty While high oil prices and heightened market volatility may signal a coming pause in this process over the longer term continued technological progress should continue to push back poverty Rapid technological progress in developing countries has been central to the reduction of poverty in recent decades While the integration of global markets has played and will continue to play a key role in this future success will increasingly depend on strengthening technical competencies and the business environment for innovative firms in developing countries Graeme Wheeler Managing Director The World Bank Technology and Developing Countries ,1994 Science, Technology and Innovation Diplomacy in Developing Countries Venugopalan Ittekkot,Jasmeet Kaur Baweja,2023-01-01 This book provides a developing country perspective on the internationalization of science and the role of Science Technology and Innovation Diplomacy STID in leveraging scientific cooperation for sustainable development In articles by individuals from government departments and academic research institutions in nine developing countries it provides a conceptual understanding of the subject and reveals the prevailing perceptions on its praxis practices The articles highlight the significance of international cooperation at bilateral regional and multilateral levels and the need for strengthening the role of STID in foreign policy and strategies of governments The book is a useful reference material to government officials diplomats academicians researchers science counsellors international relations experts science and technology professionals and other stakeholders from the developing countries and transition economies dealing with economic and developmental policy issues and or science technology and innovation STI issues in understanding the praxis and prospects of STID The book is also useful for scholars and international relations experts from developed countries in understanding STI and related issues that affect the relationship of developing countries and transition economies with their partners from the developed world **Macro Policies For Appropriate Technology In Developing Countries** Frances Stewart,2019-04-23 This book explores the effects of macro policies and determines which policies have best promoted appropriate technology in developing countries It explores the political economy of macro policies examining which groups in society are likely to benefit from alternative policies and technologies Technology Policy for Small Developing Countries David J. C. Forsyth,1990 **The Economics Of New Technology In Developing Countries** Frances Stewart,Jeffrey James,2019-09-06 This book is the outcome of a Development Studies Association Workshop on Technology that we convened in Queen Elizabeth House in March 1980 In the 1960s and 1970s most research on technology in poor countries was directed at the question of the labour

or capital intensity of production technique sometimes described as the neo classical question But recently largely as a result of the findings of such research the focus has changed quite radically The collection of essays raises questions as much as it provides answers but in so doing it provides a comprehensive introduction to the major new topics which are of substantial concern to those working on issues of technology and development

Transfer of Technology to Developing Countries

Bernard M. Hoekman, Keith E. Maskus, Kamal Saggi, 2013 The authors analyze national and international policy options to encourage the international transfer of technology distinguishing between four major channels of such transfer trade in products trade in knowledge foreign direct investment and intra national and international movement of people They develop a typology of country types and appropriate policy rules of thumb as a guide to both national policymakers and rule making in the World Trade Organization as policies should differentiate between countries The authors also develop some rules of thumb for policy intervention These include

- 1 Liberal trade policies for all types of countries
- 2 Temporary encouragement of foreign direct investment inflows for low income countries
- 3 Licensing for technical transformation and adaptive investments by local firms to apply technologies
- 4 Policy options for source economies to encourage international transfer of technology to poor countries including fiscal incentives improvement of flows of public domain technologies with appropriate subsidies and price differentiation for exports of intellectual property products
