## **Taking Stock Assessing Public Sector Reforms:**

**Taking Stock** Canadian Centre for Management Development, 1998 In the last two decades governments have invested a great deal of time money and political capital in reforms to make the public sector more efficient They have however invested little in evaluating the effectiveness of their efforts accepting many of the reforms because of a belief in a particular approach to governing or an ideological commitment on the part of politicians This collection of essays takes stock of these reform measures and their impact on public administration

**Taking Stock** Canadian Centre for Management Development, 1998 Evaluation in Public-sector Reform Hellmut Wollmann, 2003-09-26 Articles from internationally renowned scholars highlighting the connections between public sector reform and evaluation Governance in the Twenty-first Century Canadian Centre for Management Development, 2000 Numerous administrative reforms during the past several decades referred to as the New Public Management have altered government in a number of fundamental ways These changes have in turn produced the need for even greater change if the public sector is to be capable of governing efficiently and responsibly The challenges now facing government are numerous including the need to recruit capable and committed young public servants adapt to new information technology manage changing intergovernmental relations and perhaps most important hold the reformed administrative structures accountable to both political demands and legal standards Some countries have already initiated new rounds of reform while others are still attempting to understand and absorb the consequences of changes motivated by new public management ideas In Governance in the twenty first century international experts recognise both the difficulty of making predictions and the need to consider the future in order to prepare the public sector for new challenges The authors predictions and recommendations are anchored in a thorough understanding of contemporary public administration They point out that not only have previous reforms made yet more change necessary and inevitable but that the purpose of these reforms is to attempt to return government to the position of respect and competence it enjoyed in the past B Guy Peters is Maurice Falk Professor of American Government Department of Political Science University of Pittsburgh Donald J Savoie holds the Clément Cormier Chair in Economic Development at the Université de Moncton where he also teaches public administration

**Public Management Reform : A Comparative Analysis** Christopher Pollitt, Geert Bouckaert, 1999-12-09 In this major new contribution to a rapidly expanding field the authors offer an integrated analysis of the wave of management reforms which have swept through so many countries in the last twenty years The reform trajectories of ten countries are compared and key differences of approach discussed Unlike some previous works this volume affords balanced coverage to the New Public Management NPM and the non NPM or reluctant NPM countries since it covers Australia Canada Finland France Germany the Netherlands New Zealand Sweden the UK and the USA Unusually it also includes a preliminary analysis of attempts to improve management within the European Commission

**The Oxford Handbook of Governance** David Levi-Faur, 2012-03-29 The Oxford Handbook of

Governance presents an authoritative and accessible state of the art analysis of the social science literature on governance. The volume presents the core concepts and knowledge that have evolved in the study of governance in different levels and arenas of politics and policymaking. In doing so it establishes itself as the essential point of reference for all those studying politics, society and economics from a governance perspective. The volume comprises fifty two chapters from leaders in the field. The chapters are organized in nine sections dealing with topics that include governance as the reform of the state, democratic governance, European governance and global governance.

**Public Management Reform** Christopher Pollitt, Geert Bouckaert, 2017-06-30. Since the third edition of this authoritative volume most of Western Europe and North America have entered an era of austerity which has pervasive effects on programmes of public management reform. Even in Australasia extensive measures of fiscal restraint have been implemented. In this fourth edition the basic structure of the book has been retained but there has been a line by line rewriting including the addition of extensive analyses and information about the impacts of austerity. Many new sources are cited and there is a new exploration of the interactions between austerity and the major paradigms of reform: NPM, the Neo Weberian State and New Public Governance. The existing strengths of the previous editions have been retained while vital new material on developments since the Global Economic Crisis has been added. This remains the most authoritative, comprehensive, widely cited academic text on public management reform in Europe, North America and Australasia.

**Public Sector Reform** Karen Miller, 2005. This ground breaking volume provides a comprehensive review of public sector reforms and the impact of these reforms on the management of the civil service and the political administrative interface. The focus is a study of how public sector reforms have impacted upon the executive arm of government with reference to developed and developing countries. South Africa, a country which has undergone an enormous amount of reforms, is used as a case study to highlight how public sector reforms have impacted upon the executive arm of government. The book therefore provides an insight into the functioning of government, the relationship between politicians and senior civil servants and an analysis of contemporary public management in a changing global context. It will prove invaluable for a broad range of people studying or working in the field of governance, public management, public administration, development studies and international relations.

**Reinventing Government in Iceland** Ómar Hlynur Kristmundsson, 2003. The book describes a case study of governmental reform in Iceland during the period 1993-2000. Public management reform has become a political priority in Iceland as elsewhere in the world in the last two decades, a response to economic and administrative problems during this time. It has also been a reaction to ideas which have come in vogue for both diagnosing the problems of government and providing solutions. The problems identified involve the growing cost of the public sector and an inefficient and unresponsive bureaucracy. The solutions offered focus on ensuring efficiency, effectiveness and flexibility by transferring government activities to the competitive marketplace through privatization or by adopting a market mechanism within government. The literature has identified both theoretical flaws and

potential limitations in the application of current governmental reform The literature however does not provide voluminous empirical data on its effects The book includes data on the significance of public management for the central government in Iceland and illustrates how various situational factors such as administrative characteristics reform management capacity and experiential learning efforts have contributed to the reform outcome **The Korean Journal of Policy Studies** ,2013
