The Retarded Genius:

The Retarded Genius R. J. Meaddough, 1978 **Speaking Human** Adrienne Fergessen, 2017-08-25 The true story of an undiagnosed autistic savant who learned to mimic human behaviour while being abused by both teachers and students alike ultimately and wrongly arrested as a Jewish spy in Arab lands amongst other misadventures until succumbing to a suicide induced coma only to meet the woman who would transform him into the CEO of a multimillion dollar company which would eventually lead him to the ultimate tragedy

Einstein's Pathway to the Special Theory of Relativity Galina Weinstein, 2015-06-18 This book pieces together the jigsaw puzzle of Einstein's journey to discovering the special theory of relativity Between 1902 and 1905 Einstein sat in the Patent Office and may have made calculations on old pieces of paper that were once patent drafts One can imagine Einstein trying to hide from his boss writing notes on small sheets of paper and according to reports seeing to it that the small sheets of paper on which he was writing would vanish into his desk drawer as soon as he heard footsteps approaching his door He probably discarded many pieces of papers and calculations and flung them in the waste paper basket in the Patent Office The end result was that Einstein published nothing regarding the special theory of relativity prior to 1905 For many years before 1905 he had been intensely concerned with the topic in fact he was busily working on the problem for seven or eight years prior to 1905 Unfortunately there are no surviving notebooks and manuscripts no notes and papers or other primary sources from this critical period to provide any information about the crucial steps that led Einstein to his great discovery In May 1905 Henri Poincar sent three letters to Hendrik Lorentz at the same time that Einstein wrote his famous May 1905 letter to Conrad Habicht promising him four works of which the fourth one Relativity was a rough draft at that point In the May 1905 letters to Lorentz Poincar presented the basic equations of his 1905 Dynamics of the Electron meaning that at this point Poincar and Einstein both had drafts of papers relating to the principle of relativity The book discusses Einstein's and Poincar's creativity and the process by which their ideas developed The book also explores the misunderstandings and paradoxes apparent in the theory of relativity and unravels the subtleties and creativity of Einstein

What a Philosopher Is Laurence Lampert, 2018-01-26 The trajectory of Friedrich Nietzsche's thought has long presented a difficulty for the study of his philosophy How did the young Nietzsche classicist and ardent advocate of Wagner's cultural renewal become the philosopher of Will to Power and the Eternal Return With this book Laurence Lampert answers that question He does so through his trademark technique of close readings of key works in Nietzsche's journey to philosophy The Birth of Tragedy Schopenhauer as Educator Richard Wagner in Bayreuth Human All Too Human and Sanctus Januarius the final book of the 1882 Gay Science Relying partly on how Nietzsche himself characterized his books in his many autobiographical guides to the trajectory of his thought Lampert sets each in the context of Nietzsche's writings as a whole and looks at how they individually treat the question of what a philosopher is Indispensable to his conclusions are the workbooks in which Nietzsche first recorded his advances especially the 1881

workbook which shows him gradually gaining insights into the two foundations of his mature thinking The result is the most complete picture we've had yet of the philosopher's development one that gives us a Promethean Nietzsche gaining knowledge even as he was expanding his thought to create new worlds

Clinical Psychology C. Eugene Walker, 2013-11-21 The purpose of this book is to provide the reader with a survey of some of the major areas of clinical psychology No attempt has been made to include every area relevant to clinical psychology the choices are selective but represent the wide range of areas touched by clinical psychologists For some years I have felt the need for a book that provides students with more of a historical introduction and context from which to view current clinical psychology than is included in most textbooks The issues and problems of clinical psychology have been with us since the beginning of time however most psychological literature is written with the bias that anything older than five or ten years is not relevant Those who attempt to take a long range view of clinical psychology are sometimes able to recall the early development of the field in the 1930s and 1940s In this text I asked the authors to begin with a brief survey of ancient and medieval history to set the stage for a discussion of current research and developments in the field I hope that a presentation of this sort will provide the reader whether advanced undergraduate graduate or professional with a sense of perspective and context from which to view and understand clinical psychology
