Start your transformation today and unlock the best version of yourself with *Transform Your Life: Biohack Your Morning: Ice, Light and Silence* by Maya Colton, 2026-03-10.

The first hour of the day is not neutral. It is being shaped by something, either by habit by default or by deliberate choice. For a growing number of people, that choice involves cold, natural light, and quiet. Not as a performance of optimization, but as a genuine attempt to begin the day from a more grounded place. *Biohack Your Morning* explores what happens when three simple, evidence-informed practices are combined into a consistent morning ritual: cold exposure that activates physical alertness, natural light that anchors the body's internal clock, and silence that allows the mind to settle before the noise begins. It examines not just the physiological reasoning behind each practice, but the interior experience of building a morning that actually belongs to you. This book offers insight into why mornings so often feel reactive rather than intentional, and how small, deliberate interventions can quietly shift the emotional and mental tone of an entire day. It reframes biohacking not as a pursuit of peak performance, but as a return to the basic conditions under which a human being functions with more clarity, steadiness, and self-awareness. For anyone who has sensed that their mornings are running them rather than the other way around, this book explores a simpler, more honest approach to reclaiming that first hour.
