7 PHASES OF
INCIDENT RESPONSE

1 **Preparing for Potential Incidents**
Define clear communication channels, implement response checklists, and provide staff with quality cybersecurity training.

2 **Identifying and Assessing Threats**
Assess whether an event is a cyber-attack, evaluate its intensity, and classify the cybersecurity incident based on the nature of the attack.

3 **Containing the Impact**
Isolate the affected systems and impede the incident from propagating further.

**4** **Investigating and Eradicating Threats**
Make sure the threat is no longer present in the organization's network by investigating the root cause of the incident and eradicating any threats from the system.

5 **Recovering and Restoring Operations**
Restore the affected systems to their pre-incident state to get your business back up and running as normal.

6 **Learning from the Incident**
Document everything that occurred during the incident and the response. Use this information to recognize areas for improvement in the organization's security posture and incident response plan.

7 **Ongoing Testing and Evaluation**
Strengthen your security posture by continuously testing and evaluating your incident response plan to ensure that it remains current and effective in the face of ever-evolving cyber threats.
