When Men Kill:

When Men Kill Kenneth Polk,1994-11-25 Important policy issues regarding the role of gender and class in homicide are raised by descriptions of various patterns of crimes committed exclusively by males Case studies of four specific scenarios of violence supplement this qualitative statistical analysis **When Men Murder Women** R. Emerson Dobash,Russell P. Dobash,2015-04-01 In the United States and Great Britain 20 30% of all homicides involve the killing of a woman by a man In *When Men Murder Women* Dobash and Dobash two seasoned researchers and longtime collaborators in the study of violence against women reveal what they learned from a three year study that included 866 homicide case files and 200 in depth interviews with murderers in prison They focus on intimate partner murder sexual murder and the murder of older women and compare each of these three types with those in which men murder other men Each type is examined in depth and detail in a separate section that begins with an overview of relevant research and is followed by a comprehensive examination of the murder event and the lifecourse of the perpetrators There has never before been a comprehensive book that has covered the entire scope of homicide cases in which men murder women The result is this essential text for students professionals policy makers and researchers studying violence gender and crime **Cincinnati Magazine** ,1994-02 Cincinnati Magazine taps into the DNA of the city exploring shopping dining living and culture and giving readers a ringside seat on the issues shaping the region *Understanding Homicide* Fiona Brookman,2004-11-18 Lively and engaging *Understanding Homicide* impressively fills an important gap in the current criminological literature an authoritative and readable text on homicide Keith Soothill Lancaster University UK Why do people kill How is homicide investigated What are the patterns and characteristics of UK homicide How can it be prevented Here is a comprehensive and challenging text unravelling the phenomenon of homicide The author combines original analysis with a lucid overview of the key theories and debates in the study of homicide and violence In introducing the broad spectrum of different features aspects and forms of homicide Brookman examines its patterns and trends how it may be explained its investigation and how it may be prevented Areas covered include the killing of children multiple homicide including serial and mass murder terrorism and corporate homicide domestic homicide female killers homicide amongst men The book is unique in its focus coverage and style and bridges a major gap in criminological literature Whilst focused in several respects upon the UK experience of homicide the text necessarily draws upon and makes a significant contribution to international literature research and debate The text has been written in a style that will be accessible to a wide audience and assumes no prior knowledge Features to aide the student include study tasks review questions and annotated suggested further reading including internet resources *Understanding Homicide* is ideal for undergraduate and postgraduate students in the fields of criminology criminal justice psychology sociology and forensics It will also be invaluable to academics researchers and practitioners interested in the phenomenon of homicide and the broader issue of violence Worse than War Anke Hoeffler,James D. Fearon,2026-05-05

An empirically powerful account of why interpersonal violence across the globe exacts a far greater cumulative cost on society than war and terrorism combined Civil wars interstate wars and terrorism receive a great deal of media and policy attention for good reasons By contrast the major forms of interpersonal violence homicide intimate partner violence and severe physical punishment of children generally have a much lower profile In *Worse than War* Anke Hoeffler and James Fearon assemble and analyze the data on the global prevalence and costs of collective and interpersonal violence They show that interpersonal violence is vastly more widespread and imposes far greater societal costs than collective violence Wars tend to be concentrated in a small number of countries and often relatively small areas within them By contrast almost all countries have rates of homicide and nonfatal assault particularly of women and children that far exceed the global average rates of death and injury in wars and terrorism Hoeffler and Fearon argue that high rates of interpersonal violence are not simply fixed by culture or other structural factors Evidence from a host of program evaluations natural experiments and longer term social movements make it clear that rates of homicide intimate partner violence and severe physical punishment of children can be reduced if they are effectively targeted Interventions that promote peace in civil war torn countries are also possible but the opportunities are few and increasingly far between Drawing on ideas and methods from many fields economics political science public health psychology sociology and others the authors show that money and policy efforts directed toward reducing interpersonal violence thus merit higher priority both within countries and by international donors
