Mysticism had a significant role in the medieval monastic environment and along with many other things had a profound impact on Western intellectual culture. The history of mysticism in the West is a history of the greatest and most significant aspirations and potentialities of the individual regarding the understanding of oneself and the divine. Cistercian Mysticism is an outstanding example. The anthology's chapters explore key aspects of Cistercian spirituality including William of Saint Thierry's *visio Dei*, the vision of God, a transformative encounter with the divine that is central to his mysticism, as well as the concept of *sensus amoris*. Cistercian Mysticism also explores Bernard of Clairvaux's writings on the *Song of Songs* and the relation between contemplation and action, demonstrating how action, service, and contemplative love can coexist. Tradition is further enhanced by Aelred of Rievaulx's thoughts on spiritual friendship, which highlight how human relationships based on love and introspection mirror the soul's path toward divine union. By examining the writings of these influential figures, this volume offers a way to comprehend the close connection between the divine and the human soul, highlighting the importance of their contributions to the mystical and theological landscape of the Middle Ages. A book which will undoubtedly be highly enjoyed by scholars and students of all ages and religious communities. *The Century*, 1917
