Visualization Toolkit:

A Framework for Visualizing Information E.H. Chi,2013-03-14 Fundamental solutions in understanding information have been elusive for a long time The field of Artificial Intelligence has proposed the Turing Test as a way to test for the smart behaviors of computer programs that exhibit human like qualities Equivalent to the Turing Test for the field of Human Information Interaction HII getting information to the people that need them and helping them to understand the information is the new challenge of the Web era In a short amount of time the infrastructure of the Web became ubiquitous not just in terms of protocols and transcontinental cables but also in terms of everyday devices capable of recalling network stored data sometimes wire lessly Therefore as these infrastructures become reality our attention on HII issues needs to shift from information access to information sensemaking a relatively new term coined to describe the process of digesting information and understanding its structure and intricacies so as to make decisions and take action The Visualization Toolkit Will Schroeder,Kenneth William Martin,Bill Lorensen,2002
