Immunohistochemistry and immunocytochemistry are invaluable tools for the visualization of tissue and cellular antigens in
diagnostic and biological research environments The need to obtain accurate reliable and reproducible results is paramount
It is with this fundamental aim in mind that we have compiled Immunohistochemistry Essential Methods We have achieved
this by examining each aspect of immunochemistry in turn with each chapter including detailed information regarding the
subject matter in question Each chapter is written by an expert in their field and includes protocols that are typically used in
their own research Subjects covered are amongst others antibodies and their production selection of reporter labels
immunochemical staining methods and experimental design both using single and multiple reporter labels quality assurance
automated immunochemistry confocal microscopy and electron microscopy In addition benefits and limitations of each
approach are discussed within the chapters **Quilting Patchwork and Applique** Caroline Crabtree, Christine
