Margaret Barth, Melissa D. Gutschall, 2024-01-20 [Life Cycle Nutrition for Public Health Professionals](#) is the first textbook using a public health approach and population focused lens to explore nutrition across each life cycle phase. It provides the basic principles of normal nutrition across each developmental phase in the life course along with the foundational knowledge of key determinants, challenges, and outcomes among communities and populations within each nutrition phase. It covers optimal growth and development, health promotion, and prevention topics, public health nutrition issues, social determinants of health, and examples of evidence-based public health nutrition programs and policies in the United States and around the globe. Major public health nutrition themes found in life cycle phases are discussed, including food security, life stage issues in vulnerable populations, maternal and child health, childhood obesity, chronic disease prevention, optimal aging, public health nutrition emergency management issues, related to health communication and health education, as well as economic impacts of poor public health nutrition.
