What is the optimal locus of control for social assistance programs? Simons, Andrew M., 2016-04-01 Centralized implementation mandates of Ethiopia's Productive Safety Net Program PSNP require a full and uniform payment to each

person in an eligible household In practice however communities do not receive enough funding to fully implement the program Therefore communities must exercise local discretion in allocating aid We recover the preferences revealed by local communities aid allocations and find they are pro poor allocating more to underprivileged groups with lower wage earning potential e g teenage girls vs teenage boys adult women vs adult men elderly vs working age adults Despite communities pro poor implementation the program with constrained funding does not significantly lower overall poverty rates In simulations with full funding the program reduces poverty in both cases of centralized and decentralized program control using different criteria for the allocation of funds The major policy implication is that the financial scale of the safety net program is more important to poverty reduction than the locus of control over implementation **Light** ,1929 Step Ahead, Indiana Collaboration Project Step Ahead (Program),1991 *Supreme court* , **New step ahead : [split ed.]** Herbert Puchta,2009 *Electrical Dealer* ,1928 **School Management** ,1966 Jan issues include the annual The Directory of registered school suppliers **Biennial Report** Indiana.
