Strategies for Shaping Territorial Competitiveness Jesús M. Valdaliso, James R. Wilson, 2015-04-10 This book focuses on the main challenges that cities regions and other territories at sub national level face when it comes to designing and implementing a territorial strategy for economic development and competitiveness There is a widespread recognition that territories need to construct strategies that focus on shaping sustainable competitive advantages To do this they draw upon their own unique resources and capabilities alongside intelligence on existing technological and market trends However there is still a notorious lack of both theoretical and empirical research on this issue The first part of this book develops a theoretical framework for understanding and analysing territorial strategy This framework asks three questions of territorial strategy what for what and how looking closely at the key relationship between strategy and policy The second part is dedicated to exploring this framework in practice through application to a series of unique cases from around the world at different territorial levels from regions such as the Basque Country Navarre and Murcia in Spain Okanagan British Columbia in Canada Wales in the United Kingdom and the cross border region of the resund in Denmark Sweden as well as the city of Rafaela in Argentina Each case offers something different and enables the framework to be thoroughly tested generating concluding reflections that add real value for

scholars and policy makers interested in and working in the field of territorial strategy This volume is intended for the academic community the policy community government leaders policy makers policy researchers and consultants and university students and teachers at different levels interested in the areas of territorial competitiveness regional development competitiveness policies and processes of territorial strategy      **Cultural Strategies of Agenda Denial** Roger W.

Cobb, Marc Howard Ross, 1997 This is the first book devoted to examining why some issues proposed by aggrieved individuals or groups are denied access to policy agendas The book contains case studies that look at the policy process from the perspective of the strategies opponents often use to ensure agenda denial strategies usually motivated by perceived threats to widely held world views and identities      *Dynamic Modelling and Control of National Economies 1989* N.M.

Christodoulakis, 2014-06-28 The Symposium aimed at analysing and solving the various problems of representation and analysis of decision making in economic systems starting from the level of the individual firm and ending up with the complexities of international policy coordination The papers are grouped into subject areas such as game theory control methods international policy coordination and the applications of artificial intelligence and experts systems as a framework in economic modelling and control The Symposium therefore provides a wide range of important information for those involved or interested in the planning of company and national economics      **Iranian Civilization and Culture** Charles J.

Adams, 1973-01-01      **Wheat Marketing in Transition** Linda Courtenay Botterill, 2012-01-05 This detailed account tells the background story of a privatised monopoly whose sharp practices embroiled a national government in scandal and shocked a nation that prides itself on the strength of its institutions AWB Limited the former Australian Wheat Board that in the 1990s was sold into the private sector paid more than US200m in kickbacks to the pariah regime of Saddam Hussein in Iraq exploiting the provisions of the United Nations Oil for Food program by inflating the price of the wheat it sent there to disguise the pay offs that secured the contracts The ensuing uproar threatened the careers of key cabinet ministers in the Howard government and contributed to the rise and subsequent election victory of the Australian Labor Party s Kevin Rudd

**Leadership and Politics** Bryan D. Jones, 1989 In twelve essays influential scholars in political science explore the meaning of political leadership from the kaleidoscopic perspectives of the leaders institutions goals procedures problems and traditions involved The approaches as varied as the subject itself coalesce around the central question of how leaders interact with transform or are controlled by the organizations they lead      **The Encyclopedia of Public Choice** Charles

Rowley, Friedrich Schneider, 2004-07-06 The Encyclopedia provides a detailed and comprehensive account of the subject known as public choice However the title would not convey sufficiently the breadth of the Encyclopedia s contents which can be summarized better as the fruitful interchange of economics political science and moral philosophy on the basis of an image of man as a purposive and responsible actor who pursues his own objectives as efficiently as possible This fruitful interchange between the fields outlined above existed during the late eighteenth century during the brief period of the

Scottish Enlightenment when such great scholars as David Hume Adam Ferguson and Adam Smith contributed to all these fields and more However as intellectual specialization gradually replaced broad based scholarship from the nineteenth century onwards it became increasingly rare to find a scholar making major contributions to more than one Once Alfred Marshall defined economics in neoclassical terms as a narrow positive discipline the link between economics political science and moral philosophy was all but severed and economists redefined their role into that of the humble dentist providing technical economic information as inputs to improve the performance of impartial benevolent and omniscient governments in their attempts to promote the public interest This indeed was the dominant view within an economics profession that had become besotted by the economics of John Maynard Keynes and Paul Samuelson immediately following the end of the Second World War

Unfair Housing Mara S. Sidney,2003 It is difficult to ignore the fact that even as the United States becomes much more racially and ethnically diverse our neighborhoods remain largely segregated The 1968 Fair Housing Act and 1977 Community Reinvestment Act promised to end discrimination yet for millions of Americans housing options remain far removed from the American Dream Why do most neighborhoods in American cities continue to be racially divided The problem suggests Mara Sidney lies with the policies themselves She contends that to understand why discrimination persists we need to understand the political challenges faced by advocacy groups who implement them In Unfair Housing she offers a new explanation for the persistent color lines in our cities by showing how weak national policy has silenced and splintered grassroots activists Sidney explains how political compromise among national lawmakers with divergent interests resulted in housing legislation that influenced how community activists defined discrimination what actions they took and which political relationships they cultivated As a result local governments became less likely to include housing discrimination on their agendas existing laws went unenforced and racial segregation continued A former undercover investigator for a fair housing advocacy group Sidney takes readers into the neighborhoods of Minneapolis and Denver to show how federal housing policy actually works She examines how these laws played out in these cities and reveals how they eroded activists capability to force more sweeping reform in housing policy Sidney also shows how activist groups can cultivate community resources to overcome these difficulties looking across levels of government to analyze how national policies interact with local politics In the first book to apply policy design theories of Anne Schneider and Helen Ingram to an empirical case Sidney illuminates overlooked impacts of fair housing and community reinvestment policies and extends their theories to the study of local politics and nonprofit organizations Sidney argues forcefully that understanding the link between national policy and local groups sheds light on our failure to reduce discrimination and segregation As battles over fair housing continue her book helps us understand the shape of the battlefield and the prospects for victory

**Bernard Brodie and the Foundations of American Nuclear Strategy** Barry Howard Steiner,1991 Steiner analyzes how and why Brodie s understanding of weapons of unparalleled explosive force

led him to posit the need for revolutionary strategic thinking in broadminded analytic method and in the focus upon cities as nuclear targets He shows the tremendous effect Brodie s work had on the intellectual climate in which policy is determined particularly in his frequent combatting of conventional wisdom

*Government Lawyers* Cornell W. Clayton, 1995 For years many citizens have complained that our national government is fettered by legions of inefficient unaccountable feather nesting lawyers These critics might be right about the numbers there are nearly 40 000 lawyers employed by the federal government in every branch and at every level

But most of these professionals fulfill functions that are essential to or extremely valuable in running the machinery of government. In this volume, Cornell Clayton and eight other authorities on public law and legal agencies explore the role that politics play in this federal legal bureaucracy, especially within the executive branch. They provide insights into the historical development, present status, future trends, and interrelations among the offices of the Attorney General, Solicitor General, Special Prosecutor, White House Legal Counsel, Office of Legal Counsel, and counsels in regulatory agencies like the EPA and the EEOC. All the essays highlight a common theme: the perpetual tensions and conflicts between executive branch politics and the profession's principled independence. Readable and enlightening, these essays add much to our understanding of and remove some of the tarnish from this elite corps of legal experts. They should benefit anyone interested in the legal profession, presidential politics, administrative law, public policy, and bureaucratic politics in our nation's capital. *Signal*, 1993
