modern society a little stress is useful it keeps us energised and motivated to get things done it helps us to turn up and be on time Yet too much stress is harmful and stress is sadly at an all time high Unfortunately it s almost impossible to avoid or substantially reduce stress in our lives The things that make us stressed are the same things that always have too much work not enough time financial woes family needs navigating difficult relationships these familiar scenarios aren t likely to change So if we can t change the things that cause us stress we must change the way we interact with it When we feel threatened or endangered in any way our body and mind react accordingly Unfortunately these days our brain sees many threats even if they re not actually a danger to us This stress is a major problem and is now considered to be a major precipitating factor in almost all major diseases Yet if we re prepared to learn from it stress can be a useful teacher Coping with moderate amounts of stress builds a sense of mastery and it promotes resilience for life down the road Stressed spelled backwards is Desserts With that in mind through this beautifully illustrated book from illustrator and speaker Matthew Johnstone and experienced clinician Michael Player the hope is to turn one of the most unpleasant of human experiences into a sweet one

Stress Less Barbara Williams,2015-05-01 In brief stress is a feeling of being under abnormal pressure whether it is an increased workload an argument with a family member or financial worries While stress affects everyone in one way or another there are certain times and situations when pressure piles up and we need a little extra support to help us cope While research has shown that some stress can be positive making us more alert and helping us perform better in certain situations stress is only healthy if it is short lived Excessive or prolonged stress can lead to debilitating illnesses such as heart disease and mental health problems such as anxiety and depression Eventually these feelings multiply producing psychosomatic illnesses particularly extreme anxiety which may make you feel so unwell leading you to believe that you have a serious physical condition Being exposed to very catastrophic stressful and traumatic events that are outside the range of normal human experience can cause posttraumatic stress disorder PTSD This is an extreme form of stress where people feel remembrances anxiety attacks and more severe indications Examples and causal events include near death experiences loss of a loved one rape grisly accidents terrifying attacks traumatic destruction of home and deliberate acts of violence would presumably cause PTSD more than natural occurrences PTSD is a long term mental dysfunctionality that may be life threatening and may interfere with your ability to maximize on life The purpose of this book is to help you to achieve this It will assist you in identifying what it is in your life that causes you stress and how best to deal with it In most situations it is impossible to remove what it is that is causing you stress from your life completely This book also teaches you relaxation tips to better deal with these situations It is essential to manage worries as hard times will come and a positive outlook is what gets you through Marie Osmond Stress in everywhere in our surroundings and you just need to believe in yourself always go back to the person that you know you are and don t let anybody tell you any different because everyone s special and everyone s awesome McKayla Maroney

Stress-Less: (managing Stress Before Stress Damages You) Albert Agyemang, 2018-10-15

Stress has become a common word in our world today. Everything around us is moving so fast that we are forced to move along with it. Sometimes we are able to cope and other times we don't even come close. Expectations from work, family, friends, and outside sources sometimes put pressure on us that is more than we can bear. We scarcely find time to think about ourselves and about the most important things in life. We choose convenient food from the microwave instead of old-fashioned conventional food properly prepared and good for our bodies. We are stressed out and just don't have time. As a result, we are confronted with all kinds of diseases and sicknesses which ultimately reduce our lifespan. Fortunately, there is a way out. This book is designed to help you understand the general concept of stress and how to lessen its negative impact on your life. Although you can't take stress out of your life completely, there are ways that you can manage it and enjoy the beauty of life. You need to start managing stress before it damages you. Remember that you can help others best when you first learn to help yourself. This book was written with the guidance of some experts in this field and the provision God has made in His Word for a joyful life. It is the will of God that you enjoy the life He has given you and not be burdened every day with stress. Jesus said in John 10:10b, "I have come that they may have life and have it to the full. A full life is not a stress-filled life but a peaceful one. God bless you."
