The Border:

The Border Magazine Nicholas Dickson, William Sanderson, 1898 *Informal Trade, Gender and the Border Experience* Dr Olga Sasunkevich, 2015-12-28 Detailing the history of a well known phenomenon of post socialism cross border petty trade and smuggling as the history of a practice in daily life from a gendered perspective this book considers how changes in these practices in a particular border region between Belarus and Lithuania have been accompanied and to some extent provoked by changes in the border regime It looks at how the selective openness of the Belarus Lithuania border worked during different periods over the last twenty years and how it influenced the involvement of different social groups in shuttle trade practices Foremost this book considers how political borders implement and or intensify social boundaries and suggests that the selective openness of political borders a prerequisite for the existence of female shuttle trade activities is primarily built upon people s social characteristics However it claims that what can be seen as the grounds for growing inequality at a global level at a local one may have an important resourceful meaning for various social groups including those usually perceived as disadvantaged such as widowed female retirees or unemployed single women with children

Both Sides of the Border Linda Fernandez, Richard T. Carson, 2005-12-30 The Mexican United States border represents much more than the meeting place of two nations Our border communities are often a line of first defense absorbing the complex economic environmental and social impacts of globalization that ripple through the region In many ways our success or failure in finding solutions for the environmental social and economic issues that plague the region may well define our ability to meet similar challenges thousands of miles from the border zone Border residents face the environmental security concerns posed by water scarcity and transboundary air pollution the planning and infrastructure needs of an exploding population the debilitating effects of inadequate sanitary and health facilities and the crippling cycle of widespread poverty Yet with its manifold problems the border area remains an area of great dynamism and hope a multicultural laboratory of experimentation and grass roots problem solving Indeed as North America moves towards a more integrated economy citizen action at the local level is pushing governments to adapt to the driving forces in the border area by creating new institutional arrangements and improving old ones If there is one defining feature of this ground up push for more responsive transboundary policies and institutions it is a departure from the closed formalistic models of the past to a more open transparent and participatory model of international interaction
