Bukoski, 2007-08-06 There are a number of reasons why this book is important First there is no one source that summarizes what we know about the prevention of substance abuse from the research field so the book serves as a repository of accumulated knowledge on prevention theory intervention design and development and prevention research methodology Second as an evolving field prevention science has only begun to assert itself in both the arenas of practice and policy The formation of the Society for Prevention Research in 1991 was the first recognition that a science of prevention existed and required a separate forum to present the rapidly growing content of the field for discussion and review Finally there is a need to establish a baseline a reference point against which progress in the field of prevention science can be assessed This book serves all of these purposes The idea for this book grew from the observation in the early 1990s that after decades of attempts to develop effective interventions to prevent drug use among children and adolescents in the United States that we were finally having success particularly in addressing the initiation of use These successes are the result of research that has provided a better understanding of the factors and processes associated with the onset of substance use *The Prevention of Substance Use, Risk and Harm in Australia: Monograph* Wendy Loxley, 2004 *Prevention Practice in Substance Abuse* Carl G Leukefeld, Richard R Clayton, 2014-03-18 Here is helpful information about joint activities for prevention researchers

and practitioners Prevention Practice in Substance Abuse provides cutting edge information related to prevention research and practice Too frequently researchers and practitioners do not communicate from a basic understanding of concepts and principles This book begins to fill that void by providing information and recommendations for practitioners and researchers to develop projects jointly so both groups become more effective in their work Chapters in Prevention Practice in Substance Abuse are grouped into three areas background chapters contain information related to prevention in the United States data based chapters present the most recent national and international evaluation findings and conceptual chapters stimulate thought about drug abuse prevention A concluding chapter explores recommendations for joint activities and presents methods for both practice and research to enhance knowledge development Specific topics addressed by the contributing authors include mass media campaigns morality and substance abuse Hungarian adolescent drug abuse parenting practices social influences oriented substance abuse prevention curricula choosing a paradigm to guide research and practice
