The Infinite Man:

The Transbeingness of Man Thomas Martin Newald, 2016-08-26 This book is my contribution of intuitive epistemology. This book discusses many new understandings of ultimate reality but primarily new understandings of the nature of God, the nature of man, and the nature and origin of our present universe. God is described as not personal, not all powerful, not all knowing, and not all present. Individualized man is described as the unknowing expression of God. The universe is described as composed in part of the formless realm, the physical realm, the purgatorial realm, the spiritual realm, and the infinite void. The transbeingness of man is described as formless man, physical man, purgatorial man, and spiritual man. Individualized man, a nonspecific term for individualizations of infinite man, is described as alternately existing in two realities. The first reality is core reality. In core reality, individualized man is in total self-conscious unity and harmony with God. Thus, in core reality, individualized man exists in a mental self-realizing state of total harmony and bliss. The second reality is objective reality. In objective reality, individualized man experiences his infinite existence. This experiencing of existence is described as the purpose for individualized man's existence. Also, a fundamental understanding of this book is understanding the difference between real experiences and nonreal experiences. All functions within ultimate reality comprise real experiences. All experiences self-consciously created by individualized man are nonreal experiences. It is through the creative experiencing of objective existence that individualized man understands himself, God, and the purpose for his infinite existence. Finally, this book describes heaven and hell. Individualized man self-punishes himself for all his wrongdoings. God punishes no one. Hell is reserved for the individualizations of man that self-consciously reject God, but real physical hell is not a place of punishment.

Kubrick's 2001 Leonard F. Wheat, 2000-06-21 Acclaimed in an international critics poll as one of the ten best films ever made, Stanley Kubrick's 2001: A Space Odyssey has nonetheless baffled critics and filmgoers alike. Its reputation rests largely on its awesome special effects, yet the plot has been considered unfathomable. Critical consensus has been that Kubrick himself probably didn't know the answers. Leonard Wheat's Kubrick's 2001: A Triple Allegory reveals that Kubrick did know the answers. Far from being what it seems to be, a chilling story about space travel, 2001 is actually an allegory hidden by symbols. It is in fact a triple allegory, something unprecedented in film or literature. Three allegories: an Odysseus/Homer allegory, a man-machine symbiosis/Arthur Clarke allegory, and a Zarathustra/Nietzsche allegory are simultaneously concealed and revealed by well over 200 highly imaginative and sometimes devilishly clever symbols. Wheat decodes each allegory in rich detail, revealing the symbolism in numerous characters, sequences, and scenes. In bringing Kubrick's secrets to light, Wheat builds a powerful case for his assertion that 2001 is the grandest motion picture ever filmed. **Boethius: On**

Aristotle on Interpretation 4-6 Boethius, 2014-04-22 Boethius c. 480 c. 525 was a Christian philosopher and author of many translations and works of philosophy, most famously the Consolations of Philosophy, which were probably written when he was under house arrest, having been accused of treason by King Theoderic the Great. He was subsequently executed. On

Interpretation is the second part of the Organon as Aristotle's collected works on logic are known it deals comprehensively and systematically with the relationship between logic and language In his first six chapters Aristotle defines name verb sentence statement affirmation and negation Boethius preserves lost interpretations by two of the greatest earlier interpreters Alexander and Porphyry and the defence of the work's authenticity against criticism He records the idea of Porphyry that Aristotelians believe in three types of name and verb written spoken and mental in other words a language of the mind Boethius commentary formed part of his project to bring knowledge of Plato and Aristotle to the Latin speaking world It had great influence remaining the standard introduction to On Interpretation throughout the Latin Middle Ages
