Time Manifold I:

Philosophical Problems of Space and Time Adolf Grünbaum, 2012-12-06 It is ten years since Adolf Grünbaum published the first edition of this book It was promptly recognized to be one of the few major works in the philosophy of the natural sciences of this generation In part this is so because Grünbaum has chosen a problem basic both to philosophy and to the natural sciences the nature of space and time and in part this is so because he so admirably exemplifies that Aristotelian devotion to the intimate and mutual dependence of actual science and philosophical understanding More than this however the quality of his work derives from his achievement in combining detail with scope The problems of space and time have been among the most difficult in contemporary and classical thought and Grünbaum has been responsible to the full depth and complexity of these difficulties This revised and enlarged second edition is a work in progress in the tradition of reflective analysis of modern science of such figures as Ehrenfest and Reichenbach In publishing this work among the Boston Studies in the Philosophy of Science we hope to contribute to and encourage that broad tradition of natural philosophy which is marked by the close collaboration of philosophers and scientists To this end we have published the proceedings of our Colloquia of meetings and conferences here and abroad as well as the works of single authors **Fichte** Johann Gottlieb Fichte, 2018-07-05 No detailed description available for Fichte *Personality and Telepathy* Frank Challice Constable, 1911

Kant's Transcendental Deduction Alison Laywine, 2020 Alison Laywine presents a new interpretation of one of the most famous texts in modern philosophy Kant's Transcendental Deduction in his Critique of Pure Reason She shows how Kant developed his view of a world as a whole unified by universal laws and his view of experience as the whole of all possible appearances unified by universal laws *Tagore, Einstein and the Nature of Reality* Partha Ghose, 2019-04-02 This volume consists of a selection of scholarly essays from literature philosophy and history on the conception of reality as understood by Rabindranath Tagore and Albert Einstein The nature of reality has been a long debated issue among scientists and philosophers Tagore 1861-1941 met Einstein 1879-1955 at the latter's house in Kaputh Germany on 14 July 1930 and had a long conversation on this issue This conversation has been widely quoted and discussed by scientists philosophers and scholars from the literary world The important question that Tagore and Einstein discussed was whether the world is a unity dependent on humanity or the world is a reality independent of the human factor Einstein believed that reality is independent of the mind and the human factor On the other hand Tagore adopted the opposite view Nevertheless both Einstein and Tagore claimed to be realists their conceptions of reality were obviously fundamentally different Where does the difference lie Can it be harmonized at a deeper level This volume brings together for the first time a gamut of views on this subject from eminent scholars It presents some key reflections on reality language poetry truth science personality human sciences virtue ethics intelligibility and creativity It will be useful to scholars and researchers of philosophy literature history and political studies as also to those interested in Tagore The Warner Library Charles Dudley Warner, John William Cunliffe, Ashley
