

EXPLORERS ON THE MOON

The first manned rocket bound for the Moon has just been launched from the Nuclear Research Centre at Sprody in Syldavia*. On board are Tintin, Snowy, Captain Haddock, Professor Calculus and Wolf, the engineer. At the Centre, intense efforts are being made to establish radio contact with the Moon rocket. There is an anxious wait for members of the expedition to regain consciousness lost at lift-off through gravitational pressure. However, the wireless masts of the Observatory Post, standing high in the night sky, receive no answer...

Hello!... Hello!... Earth here calling Moon rocket... Are you receiving me?... Earth calling Moon rocket...

My God, imagine if we made a mistake in our calculations!... That would be dreadful!

Hello!... Hello!... Earth calling Moon rocket!

Meanwhile, far away, others unknown to them are also listening in...

Hello!... Earth calling Moon rocket... Are you receiving me?...

It would be a serious blow for us, damn it, if they're all dead inside!

Facing Gaia Bruno

Latour,2017-09-05 The emergence of modern sciences in the seventeenth century profoundly renewed our understanding of nature For the last three centuries new ideas of nature have been continually developed by theology politics economics and science especially the sciences of the material world The situation is even more unstable today now that we have entered an ecological mutation of unprecedented scale Some call it the Anthropocene but it is best described as a new climatic regime And a new regime it certainly is since the many unexpected connections between human activity and the natural world oblige every one of us to reopen the earlier notions of nature and redistribute what had been packed inside So the question now arises what will replace the old ways of looking at nature This book explores a potential candidate proposed by James Lovelock when he chose the name Gaia for the fragile complex system through which living phenomena modify the Earth The fact that he was immediately misunderstood proves simply that his readers have tried to fit this new notion into an older frame transforming Gaia into a single organism a kind of giant thermostat some sort of New Age goddess or even divine Providence In this series of lectures on natural religion Bruno Latour argues that the complex and ambiguous figure of Gaia offers on the contrary an ideal way to disentangle the ethical political theological and scientific aspects of the now obsolete notion of nature He lays the groundwork for a future collaboration among scientists theologians activists and artists as they and we begin to adjust to the new climatic regime

Artificial Gravity Gilles Clément,Angeli Bukley,2007-05-28 William H Paloski Ph D Human

Adaptation and Countermeasures Office NASA Johnson Space Center Artificial gravity is an old concept having gotten its start in the late in the 19th century when Konstantin Tsiolkovsky considered by many to be the father of the Russian space program realized that the human body might not respond well to the free fall of orbital space flight To solve this problem he proposed that space stations be rotated to create centripetal accelerations that might provide inertial loading similar to terrestrial gravitational loading Einstein later showed in his equivalence principle that acceleration is indeed indistinguishable from gravity Subsequently other individuals of note including scientists like Werner von Braun as well as artists like Arthur C Clarke and Stanley Kubrick devised elaborate solutions for spinning vehicles to provide artificial gravity that would offset the untoward physiological consequences of spaceflight By 1959 concerns about the then unknown human responses to spaceflight drove NASA to consider the necessity of incorporating artificial gravity in its earliest human space

vehicles Of course owing in part to the relatively short durations of the planned missions artificial gravity was not used in the early NASA programs *Explorers on the Moon* Hergé,1976 Tintin and his friends are involved in the first manned flight to the moon which proves perilous The Adventures of Tintin Hergé,2015 Tintin 23 albums i 8 bind **Explorers on the Moon (the Adventures of Tintin)** Hergé,1991-07 Japanese edition of Explorers on the Moon The Adventures of Tintin World famous globe trotting reporter Tintin and friends are going to the moon But a sabateur is planning to cut short the trip Will they arrive safely and what will they see
