Summary: Tuned In BusinessNews Publishing,2014-11-12 The must read summary of Craig Stull Phil Meyers and David Meerman Scott s book Tuned In Uncover the Extraordinary Opportunities that Lead to Business Breakthroughs This complete summary of the ideas from Craig Stull Phil Meyers and David Meerman Scott s book Tuned In shows that there s no use developing new products in isolation and hoping they will sell A better idea is to find overlooked marketplace problems which already exist Solve those problems for people and you ll have no issue finding willing customers who won t need to be coerced into buying Real success in the marketplace is not based on creativity or even on clever marketing Instead you need to develop products that resonate with people In their book the authors explain the six step Tuned In Process that you can use to get tuned in and develop the products that customers really want Added value of this summary Save time Understand key concepts Expand your knowledge To learn more read Tuned In and discover why you should get tuned in to your

business and develop products that solve real problems **The Geologic Time Scale 2012** F M Gradstein,2012-08-14 The Geologic Time Scale 2012 winner of a 2012 PROSE Award Honorable Mention for Best Multi volume Reference in Science from the Association of American Publishers is the framework for deciphering the history of our planet Earth The authors have been at the forefront of chronostratigraphic research and initiatives to create an international geologic time scale for many years and the charts in this book present the most up to date international standard as ratified by the International Commission on Stratigraphy and the International Union of Geological Sciences This 2012 geologic time scale is an enhanced improved and expanded version of the GTS2004 including chapters on planetary scales the Cryogenian Ediacaran periods systems a prehistory scale of human development a survey of sequence stratigraphy and an extensive compilation of stable isotope chemostratigraphy This book is an essential reference for all geoscientists including researchers students and petroleum and mining professionals The presentation is non technical and illustrated with numerous colour charts maps and photographs The book also includes a detachable wall chart of the complete time scale for use as a handy reference in the office laboratory or field The most detailed international geologic time scale available that contextualizes information in one single reference for quick desktop access Gives insights in the construction strengths and limitations of the geological time scale that greatly enhances its function and its utility Aids understanding by combining with the mathematical and statistical methods to scaled composites of global succession of events Meets the needs of a range of users at various points in the workflow researchers extracting linear time from rock records students recognizing the geologic stage by their content

The Archaeomusicology of the Ancient Near East Richard J. Dumbrill,2005 This volume is a massive leap forward over any previous synthesis of the subject and includes at the very minimum so much information that its academic and scientific value is self evident The freshness and profundity of Dumbrill s approach to the subject exceeds anything attempted before The mythology of ancient Mesopotamia proves readable as tonal allegory when its numerology is decoded as tuning theory

By the third millennium BC both pentatonic and heptatonic tunings were quantified throughout the entire 12 tone gamut Richard Dumbrill has documented the massive empirical experience with strings and pipes that makes this early musicalization of the universe believable The volume consists in 4 parts with foreword by Prof Ernest McClain The first is about the decipherment translation and interpretation of the few theoretical cuneiform texts dating from the Old Babylonian period about 2000 BC to Neo Assyrian up to the mid first millennium BC Dumbrill undertakes comparative analyses and criticism of various interpretations having preceded his own and introduces new material The second part is about the Hurrian hymns the earliest music ever written circa 1400 BC and are produced in their integrality Attempts to the interpretation of Hymn H 6 are compared and followed by Dumbrill s methodology and interpretation Each fragment of the collection is analyzed separately The part concludes with statistical analyses attempting at the reconstruction of some Hurrian rules of composition The third part consists in the organology with relevant philology and is the largest collection of the Mesopotamian instrumentarium The last part is a unique lexicon of all known Mesopotamian terminology with quotation of texts in which the philology appears The book had been previously published under the title of *The Musicology and Organology of the Ancient Near East* and now appears under its new title *Organs and Tuning* Thomas Elliston,1895
