1 Energy Master Plan Continued Research

1.1 Introduction

The New Jersey (NJ) and Governor's Office seek to make additional efforts to ensure that the master plan is a feasible design. It provides more information on the status of the plan.

The work scope includes all of the work that is required for the plan to be completed by the end of 2024.

The following table lists the work to be completed by the end of 2024. The work scope includes the work that is required for the plan to be completed by the end of 2024.

1.1 Task 1: Update New Jersey EDP Progress Report to Reflect Progress Through End of 2024

It will include a full review of policy and programmatic progress made since the last report was completed in October 2023. This will ensure the EDP meeting includes any additional progress made through the end of 2024. Based upon the findings of this work, it will inform the progress made and the progress report update of the EDP report.

1.2 Task 2: Model Additional Supply Side Resource Scenarios

The additional modeling activities include the following: adding to the scenarios and quantifying the impact of adding various supply side resources, such as distributed energy resources, and forecast the output.

1.2 Task 3: Determine Modeling Impacts of New Scenarios

The team will have completed a full understanding of the modeling impacts of the new scenarios. This will include the modeling of the new scenarios, which will include energy generation, modeling to a feasible design, and the impact of the new scenarios on the additional generation from Task 2 is modeling in order to inform the report. The findings from these modeling will be included in the EDP report.

1.4 Task 4: Update Customer Cost, Revenue Requirement Models, and Cost Models with New Scenarios

It will assess the customer cost, demand, distribution models, and update cost models with the additional new scenarios. This will include the modeling of the new scenarios, which will include energy generation, modeling to a feasible design, and the impact of the new scenarios on the additional generation from Task 2 is modeling in order to inform the report. The findings from these modeling will be included in the EDP report.
