Understanding Educational Psychology Wolff-Michael Roth, Alfredo Jornet, 2016-08-19 This book takes up the agenda of the late but unknown L S Vygotsky who had turned to the philosopher Spinoza to develop a holistic approach to psychology an approach that no longer dichotomized the body and mind intellect and affect or the individual and the social In this approach there is only one substance which manifests itself in different ways in the thinking body including as biology and culture The manifestation as culture is premised on the existence of the social In much of current educational psychology there are unresolved contradictions that have their origin in the opposition between body and mind individual and collective and structure and process including the different nature of intellect and affect or the difference between knowledge and its application Many of the same contradictions are repeated in constructivist approaches which do not overcome dichotomies but ratheracerbate them by individualizing and intellectualizing our knowledgeable participation in recognizably exhibiting and producing the everyday cultural world Interestingly enough L S Vygotsky who is often used as a referent for making arguments about inter and intrasubjective mental constructions developed towards the end of his life a Spinozist approach according to which there is only one substance This one substance manifests itself in two radically different ways body material biology and mind society culture But there are not two substances that are combined into a unit there is only one substance Once such an approach is adopted the classical question of cognitive scientists about how symbols are grounded in the world comes to be recognized as an artefact of the theory Drawing on empirical materials from different learning settings including parent child school and workplace settings this book explores the opportunities and implications that this non dualist approach has for educational research and practice
