Understanding Dialogue In Distance Education Titi Chandrawati, 2015 Distance education DE has been defined as an educational process in which there is a separation between the students and their instructors or their institution Since distance education has been used for mass education the teaching and learning process has tended to use a monologue approach i e information transmitted from the instructor or learning materials to the students This has led to some students feeling isolated from their instructor and the other students and has resulted in relatively low completion rates The effective use of the Internet could be a way to reduce this isolation by using an online dialogue approach in the teaching and learning process The main goal of this study was to investigate if using a dialogue approach in UT s online learning tutorials for Early Childhood Education would reduce the banking concept of education in that program Other goals included investigating what

students would learn from this approach if they felt that this would make them better teachers and whether this approach would be beneficial to UT I applied a dialogue approach inspired by Freire and Vella and developed a set of eight criteria that are required in a true dialogue process These included show respect create and maintain a safe environment for self and students assess needs and context exercise praxis action with reflection exchange teacher student roles and engage in the learning process A qualitative case study was used to explore the use of a dialogue approach in an online tutorial and how the online tutor and students who participated in the dialogue based online tutorial would learn from this experience at the Indonesian Open University Universitas Terbuka or UT The results of this study showed that with a small amount of advance training students and their tutor are able to engage in a dialogue approach in the online tutorials at UT In this study the banking concept of learning for ECE students was reduced students and tutors learned many useful things and both the students and the tutor felt that this dialogical form of online learning was helping them experience a meaningful learning process However because the number of subjects is quite small there is only a very limited ability to generalize the findings

Theoretical Principles of Distance Education Desmond Keegan, 2005-08-15 According to UNESCO statistics 10 million of the world's 600 million students study at a distance *Theoretical Principles of Distance Education* seeks to lay solid foundations for the education of these students and for the structures within which they study As a more industrialised form of education provision distance education is well adapted to the use of new communication technologies and brings to education many of the strengths and dangers of post industrialism The central focus of the study of distance education is the placing of the student at home or at work and the justification of the abandonment in this form of education of interpersonal face to face communication previously considered to be a cultural imperative for education in both east and west This book explores the problems that distance education poses to the theorist bringing together an international team of distance educators to address these issues for the first time in a systematic way The team comprises theoreticians administrators experts in educational technology and adult education experts in learning from video machines from computers and other forms of technology Contributions from Italy and Scandinavia contrast with viewpoints provided by scholars from the US Canada Australia and the UK

Learning Online George Veletsianos, 2020-05-19 What's it really like to learn online *Learning Online: The Student Experience* Online learning is ubiquitous for millions of students worldwide yet our understanding of student experiences in online learning settings is limited The geographic distance that separates faculty from students in an online environment is its signature feature but it is also one that risks widening the gulf between teachers and learners In *Learning Online* George Veletsianos argues that in order to critique understand and improve online learning we must examine it through the lens of student experience Approaching the topic with stories that elicit empathy compassion and care Veletsianos relays the diverse day to day experiences of online learners Each in depth chapter follows a single learner's experience while focusing on an important or noteworthy aspect of online learning tackling everything from

demographics attrition motivation and loneliness to cheating openness flexibility social media and digital divides Veletsianos also draws on these case studies to offer recommendations for the future and lessons learned The elusive nature of online learners experiences the book reveals is a problem because it prevents us from doing better from designing more effective online courses from making evidence informed decisions about online education and from coming to our work with the full sense of empathy that our students deserve Writing in an evocative accessible and concise manner Veletsianos concretely demonstrates why it is so important to pay closer attention to the stories of students who may have instructive and insightful ideas about the future of education

Teaching and Learning at a Distance Michael R. Simonson,2003 The second edition of this leading book offers everything readers need to know in order to make the experience of the distance learner as complete and satisfying as that of the local learner Here is concise to the point coverage of the foundations of the field and how it came to be dominated by the World Wide Web and the Internet And here is expansive practical hands on instruction in exactly how to do distance teaching through computer technology videotape or simple audio techniques Increased coverage of online learning provides specifics on designing delivering and evaluating online learning in every chapter Moreover the authors cover such hard to address topics as copyright protection and plagiarism and offer treatment of multiple instructional models suitable for distance education For distance teachers and learners
