Piaget's Genetic Epistemology for Mathematics Education Research Paul Christian Dawkins, Amy J. Hackenberg, Anderson Norton, 2024-01-02 The book provides an entry point for graduate students and other scholars interested in using the constructs of Piaget's genetic epistemology in mathematics education research. Constructs comprising genetic epistemology form the basis for some of the most well-developed theoretical frameworks available for characterizing learning particularly in mathematics. The depth and complexity of Piaget's work can make it challenging to find adequate entry points for learners not least because it requires a reorientation regarding the nature of mathematical knowledge itself. This volume gathers leading scholars to help address that challenge. The main section of the book presents key Piagetian constructs for mathematics education research such as schemes and operations, figurative and operative thought, images and meanings, and decentering. The chapters that discuss these constructs include examples from research and address how these constructs can be used in research. There are two chapters on various types of reflective abstraction because this construct is Piaget's primary tool for characterizing the advancement of knowledge. The later sections of the book contain commentaries reflecting on the contributions of the body of theory developed in the first section. They connect genetic epistemology to current research domains such as equity and the latest in educational psychology. Finally, the book closes with short chapters portraying how scholars are using these tools in specific arenas of mathematics education research including in special education, early childhood education, and statistics education.

*The Developing Person Through the Life Span* Kathleen Stassen Berger, 2005 The *Developing Person Through the Life Span* Sixth Edition presents theory, research, practical examples, and policy issues in a way that inspires students to think about human development and about the individual's role in the community and the world. Review the new edition and you'll find Berger's signature strengths on display: the perceptive analysis of current research, the lively and personal writing style, and the unmistakable commitment to students. You'll also find a wealth of new topics plus a video-based Media Tool Kit that takes the teaching and learning of human development to a new level.
